between

Full Name of the Client

Address: Street and Number

Address: Post Code and Town

(referred to hereafter as the "Customer")

and

CPB Software (Germany) GmbH

Im Bruch 3

D-63897 Miltenberg

(referred to hereafter as the "Service Provider")

agree to the following:

Example

§ 1

Preamble

The purpose of the contract entails the provision of data pertaining to financial securities' classes, through the platform entitled wmAccess, via the Internet. Master static data and maturity data relating to financial securities, are contained in the said universe of financial securities' classes. The data originates from the official National Numbering Agency of Germany, called Wertpapier-Mitteilungen [WM-Datenservice]. wmAccess is a product suite, which includes the following three components; wmView, wmProfile and wmGuide.

§ 2

Scope and type of services to be delivered by the service provider

The service provider is hereby contractually bound to provide the customer, data originating from Wertpapier-Mitteilungen, and to allow retrieval and access to an inherent, specifically stipulated & registered, closed end-user group of the customer, through this contract. The data originates from the official National Numbering Agency of Germany, called Wertpapier-Mitteilungen [WM-Datenservice]. Retrievable historic corporate event data related information, goes back up to 5 years.

Specifically, the following data will be made accessible and retrievable:

Classification of work categories/areas

B	-	Coupon renewal
E	-	Income data
G	-	Securities static data
H	-	Annual General Meetings (AGMs)
I	-	Investment fund prices (including inherent unrealized profits or losses thereof)
K	-	Capital changes
M	-	Issuer data
P	-	Stopped securities
R	-	Investment and risk management
U	-	Conversions/exchanges
V	-	Redemptions/Call-ins
X	-	Trading rules and regulations

Active field-IDs will appear in each of the work categories/areas, which are populated by data originating from the German National Numbering Agency; WM Datenservice. The data is updated on every Exchange working day. The most current updates are available from 06:00 a.m. onwards on every Exchange working day. The service provider cannot assume any responsibility whatsoever, for any delayed or incomplete data originating from the data provider - the German National Numbering Agency; WM Datenservice. Similarly, the service provider cannot assume any responsibility whatsoever, with respect to external telecommunication connectivity and data transmission guarantees. wmAccess offers a variety of customizable searches. Differing selection criteria can be input, for researching data in each of the work categories/areas. After selecting the high level parsed results, specific and detailed underlying relevant data can be retrieved. wmProfile allows partial viewing of the WM data content. Based on the specific criteria selected by a user, a list of data fields from one or more work categories/areas is displayed. The compilation of the data fields is based on specific functional criteria. By utilizing the application entitled "User Profile", end users can access company specific profiles. The display of the data fields can be configured individually. The relevant explanations to the data fields are available through wmGuide. wmGuide delivers a verbal description of the data fields, and a licensed version of wmGuide includes all table specifications.

§ 3

Payment

Clause (1)

The payment for the data retrieval is based on the relevant price tables. The pricing overviews appear in Annexes 1, 2, and 3, which are a part of this contract. The customer chooses one of the offered pricing models. A change in the pricing model type is possible, based on a written notice two weeks before the end of any given month.

Clause (2)

Should the customer choose to utilize wmGuide in pricing model #s 1 or 2, an invoice bearing the annual utility fee will be transmitted by the service provider. The duration period for utilizing wmGuide always encompasses one calendar year, and the utilization fee is due in January of the year in question. Should the customer terminate the contract later than six weeks before the end of a calendar year, the annual subscription amount for the following year automatically becomes due. Should the customer terminate the contract at any time during any given year, but more than six weeks before the end of the year in question, the subscription amount relating to the remaining day count up to and including the end of the said year, will not be reimbursed.

Clause (3)

The service provider has the right to adjust and conform the prices to market changes and requirements. Should the service provider see it fit to do so, the customer will be informed in writing at least four weeks in advance. Should the customer not contradict the same in writing, within four weeks of receipt of the pricing change declaration, the service provider will consider this as an acceptance of the pricing change, on the part of the customer.

Clause (4)

The number of search queries included in pricing model # 3 are valid for a duration of one calendar month. The invoice related calculation of the above mentioned search queries begins at that point in time, when the first of such a query is done, and ends at the end of the same calendar month. The remainder of the number of "unused" search queries included in the data packages entitled 'on demand' are a part of pricing model # 3, and expire at the end of the calendar month, in which the first of such a search query is done. Search queries which go beyond the number included in the 'on demand' data package, will be invoiced on an "additional individual search" basis. Should the number of "additional individual searches" exceed the number of "included" search queries of the subscribed category, the next larger category for search queries automatically gets selected and activated.

§ 4**Invoicing**

The customer receives a monthly statement displaying the total amount of retrieved data. Additionally, the customer receives an invoice indicating the total amount payable to the service provider. The total invoice amount is immediately due without any deductions.

§ 5**Contract Duration and Right of Termination****§ 5.1****Duration and Termination**

The contract is open ended, and has no expiry date. The contract can be terminated with a notice period of one month to the end of every quarter.

§ 5.2

Special Right of Termination

In the event of price changes, the customer has an extraordinary right to terminate the contract, as per the provision appearing in §3, clause (3).

§ 6

Technical Prerequisites

wmAccess utilization assumes that the customer has access to the Internet. The customer is liable for the installation and support of the relevant Internet access. Microsoft Internet Explorer version 5.x or higher is necessary. The service provider recommends access to a PC with at least 256 MB RAM, coupled with a Pentium III or comparable processor.

§ 7

Warranty and Liability

The service provider is obliged to rectify problems within a reasonable time frame. The service provider is explicitly not to be held liable, in case the customer experiences interruptions in accessing the Internet. Should the unavailability of, or interruptions in accessing wmAccess, lie within the fiduciary domain of the service provider, the utmost will be undertaken to resolve the problem. The service provider is deemed free of all liabilities, unless the proximate cause of any damages is legally deemed to be premeditated or negligent in nature. In particular, the service provider undertakes no responsibility whatsoever for the accuracy of the data.

§ 8

Professional Confidentiality

The service provider pledges to exercise confidentiality in dealing with customer related data. In particular, such data will not be made accessible to third parties.

§ 9

Other Agreements

The invalidity of singular paragraphs and/or clauses of this contract, do not invalidate the contract in its entirety. Invalid components of the contract will be replaced by valid ones, without any disadvantages to any of the parties concerned. Any changes or additions to the contract have to necessarily be in writing and must be explicitly demarcated as such. The place of jurisdiction for both parties is Frankfurt am Main.

§ 10

Pricing Model and Utility Scope

The customer opts to be billed based on

Pricing Model # 1 / # 2 / # 3

The customer chooses to utilize wmGuide

Yes / No

The customer chooses to utilize wmPos

Yes / No
