Query Category  
G2

Explanations

FAQ

Examples

## Overview:

Category: G2

Type of query: Selection of a segment

Quality: Segment with all fields

## Type of query: Selection of a segment

*What is a selection of a segment?*

Segments are called up in wmGuide in the tab “Sections” or by browsing through the individual segments in this tab.

# Quality: Segment with all fields

*What is a segment with all fields?*

For the selected segment all WM fields are displayed sorted by field identification, including field description, field type / format, including length, the possible stored table (value range), and the current state of the data field.

## FAQ:

*For which areas does this category apply?*

This query category is only charged in wmGuide in the tab “Sections”.

*Will G2 be charged again, if a segment is called up a second time?*

Yes, a second call-up will be charged – unless the segment is called up over a change of tab.

Example:

## Select Segment (G) – Security static data

The screenshot shows the WMACCESS web application interface. The top navigation bar includes 'Introduction' and 'Sections'. A 'Show Sections' dropdown menu is open, listing various data segments. A mouse cursor is hovering over the '(G) Securities Static Data' option. Below the menu, a list of segments is visible, including BD007, BD008, and BD009. The status bar at the bottom indicates the date and time: 8.6.2011 13:50:13 [+0:01].

## Tips:

- Print out the overview of all WM fields of the selected work field. This will facilitate the later call-up of the functional field description.
- A print out will not lead to a separate charge of a query category.
