Query Category

G4

Explanations

FAQ

Examples

## Overview:

Category: G4

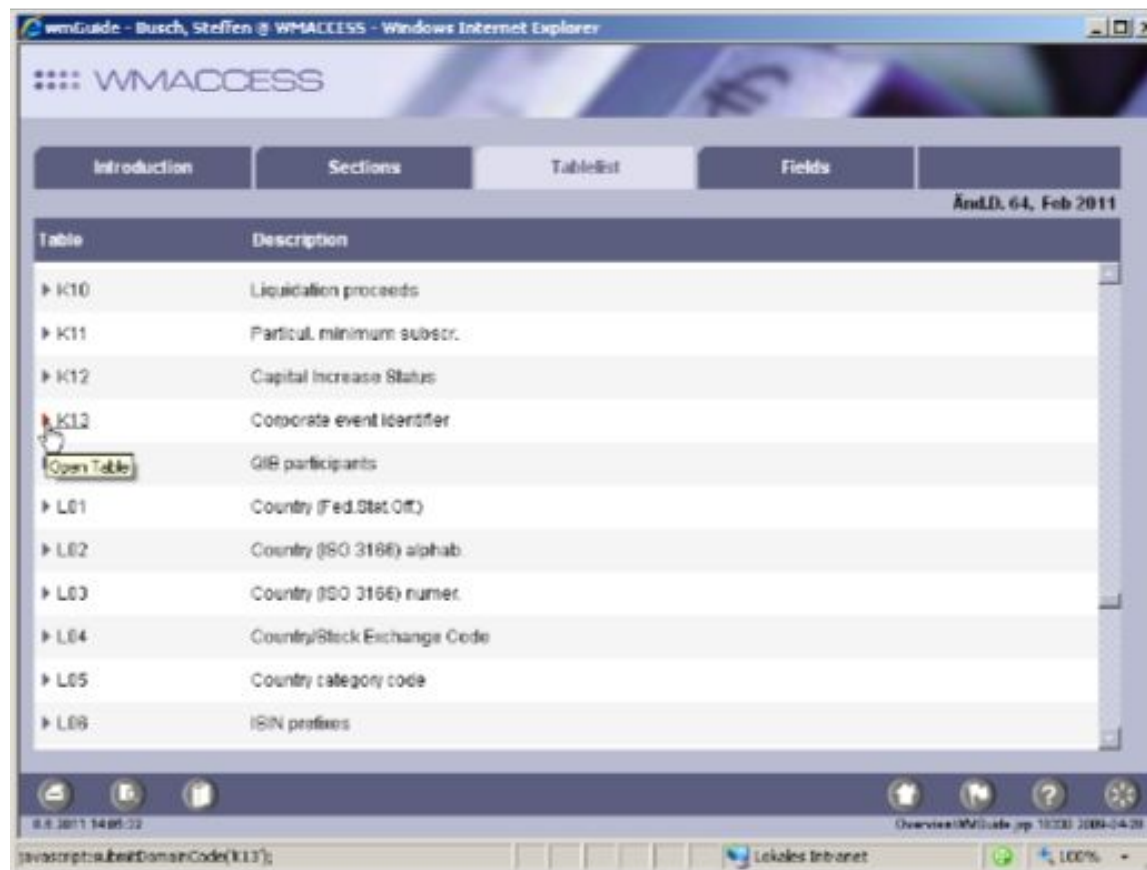

Type of query: Selection of a table

Quality: Display of the table characteristics (value incl. description)

# Type of query: Selection of a table

*What is a selection of a table?*

A table like “K13” – “Corporate event identifier” is called up either by clicking on the table itself, or on a field identification, which has lodged a table.

# Quality: Display of the table characteristics

*What is a display of the table characteristics?*

After calling up a table of a field identification with lodged table, the relevant table values are displayed. In doing so, the relevant values (=value range) as well as their description are shown.

The screenshot shows a web browser window titled 'wmGuide - Busch, Steffen & WMAccess - Windows Internet Explorer'. The application header includes the 'WMAccess' logo and a navigation menu with 'Introduction', 'Sections', 'Tabletbl', 'Fields', and 'Table'. The 'Tabletbl' tab is active, displaying a table with the following data:

Table designation		Length	Type	Status	Table
Corporate identifier		3	K	Active	K13
Value	Short text	Form text	Free text		
010	CI S207	CI comp.res. S207ff.	Capital increase out of company reserves; Capital increase out of company reserves by German companies in accordance with Sections 207 ff. of the German Stock Corporation Act (Nos. 20-22 of the Ministry of Finance letter of 25.10.2004)		
011	CI n. S207	CI comp.res. not S207ff.	Capital increase out of company reserves by German companies not in accordance with Sections 207 ff. of the German Stock Corporation Act (No. 21 of the Ministry of Finance letter of 25.10.2004)		
012	CI n. S207	CI comp.r.not S207 n.l.	Capital increase out of company reserves by German companies not in accordance with Sections 207 ff. of the German Stock Corporation Act (No. 21 of the Ministry of Finance letter of 25.10.2004); Classification effected according to regulations agreed upon with financial industry associations, as no definitive information provided by issuer		

The bottom of the browser window shows the status bar with the date '10.10.2011 14:00:50' and the address 'http://localhost:8080/...'. The taskbar at the very bottom shows the 'Lokalizer Internet' application.

## FAQ:

*For which areas does this category apply?*

This query category is only charged in wmGuide in the tabs “Tablelist” and “Fields”. Under “Table” all existing tables are listed – a click on a table will display all table parameters and thus represents a category G4 query. Furthermore, the table parameters are shown under “Fields”, if the displayed field identification has allocated a table – e. g. the field GD161 (country of origin) contains the table “L02” (country codes in accordance with ISO 3166).

## FAQ:

*Will G4 be charged again, if a table is called up a second time, e. g. a field identification with table or table link is clicked on a second time?*

Yes, each display of a table incl. table values will be charged, independent of whether it has been displayed before.

Example:

Click of field „KD087“ to display the field description and the associated values of table „K13“

## Tips:

- Print the table parameters to save costs, if you want to view the values of a table again later.
- A print out will not lead to a separate charge of a query category.
