

Data structure adjustments within the EDDy_neu project

DOCUMENTATION
D20 – 30.09.2022

This translation is provided for convenience only; the German version is authoritative.

Version 1.6

As of 09/2022

Valid from 04/2023

TABLE OF CONTENTS

Change log	4
1. Data structure adjustments in the context of EDDy_neu	10
2. Customer number / WM issuer identification number	11
2.1. Issuer identification number	12
2.2. Legal Entity Identifier	13
2.3. Settlement agent number	14
2.4. Numerator	15
2.5. Examples	15
3. Dummy WKN	20
4. Depiction of market places	21
5. Master data on thresholds and redemptions (formerly conversions/exchanges)	26
6. Segment M - Issuer data.....	33
6.1. Information/fields are deactivated in Segment M and replaced by new fields in Segment M 33	
6.2. Information/fields are deactivated within the financial instruments. In the future, the information will only be provided in Segment M.	43
6.3. Information/fields in Segment M that are omitted	46
6.3.1. Information/fields that are deleted in Segment M and simultaneously deactivated at the financial instrument level.	49
6.4. Entirely new or additional information/fields in Segment M.....	50
6.4.1. Issuer ratings.....	50
6.4.2. Other customer and/or Issuer data	58
6.4.2.1. Address data.....	58
6.4.2.2. Register data.....	60
6.4.2.3. Company affiliation acquiring legal entity.....	60
6.4.2.4. Company affiliations funds	61

6.4.2.5. Miscellaneous information	62
7. Depiction of instrument ratings	63
7.1. Information/Fields that are omitted in Segment G	63
7.2. Familiar depiction of the ratings in Segment G	66
7.3. Entirely new information/fields in Segment G	68
8. Text fields in T format / Supplementary text fields	74
8.1. Texts behind fields in 'T' or 'V' format	74
8.2. Creation of new, structured variables	77
8.3. Deleted old fields	92
8.4. Text fields that remain	93
8.5. Supplementary texts behind structured fields	94
9. Segment P –stopped securities	122
10. Reconciliation of the information provided by the depositories	122
10.1. Background	122
10.2. New table variables	123
10.2.1. Income	123
10.2.2. Redemptions	124
10.2.3. Corporate actions	125
10.2.4. Conversions/exchanges	128
10.2.5. Omitted fields	132
11. WKN/ISIN Change	133
11.1. Introduction	133
11.2. Functional procedure	133
11.2.1. Delivery identifier 8	133
11.2.2. List of securities	133
11.2.3. Data delivery	133
11.3. Omission of change procedures	133
11.4. Change procedures	135
11.5. Variables	136
11.5.1. Important Variables for the business operation ISIN change.	136
11.5.2. Important variables for the business operation master data	137
11.5.3. Variables Relevant for the business operation ISIN Change	137
11.6. Description of the master data set	143
11.6.1. Cancellation of the old ISIN/WKN master data record	143
11.6.2. Provision of the new ISIN/WKN master data record "ISIN change without change of financial instrument"	143
11.6.3. Provision of the new ISIN/WKN master data record "ISIN reactivation"	143

11.6.4.Provision of the new ISIN/WKN master data record "ISIN change variation"	144
11.7. Provision of lifecycle data	144
11.7.1.Corporate Actions	144
11.7.2.Special cases ISIN/WKN changes CV, CW, CX	145
11.7.3.Stock market data	145
11.8. Correction of an incorrect ISIN/WKN change	145
11.9. Matrix for the data provision with example:	146
11.9.1.Matrix for the data provision: ISIN/WKN change Reason CW, CV, CX.....	148
11.9.2.Matrix for the data provision: ISIN/WKN change Reason CF, CG, CH, CI, CJ, CK, CL	149
11.9.3.Matrix for the data provision: ISIN/WKN change Reason CU.....	150
11.10. Delivery examples	151
11.10.1. Delivery example for an ISIN change without change of financial instrument	151
11.10.2. ISIN Reactivation	155
11.10.3. ISIN change - correction of an ISIN incorrectly assigned to the WKN (WKN remains unchanged)	157
11.10.4. ISIN change - correction of a WKN incorrectly assigned to the ISIN (ISIN remains unchanged)	159
11.10.5. ISIN change - cross correction, ISIN 1 assigned to WKN 1 must be replaced by ISIN2 assigned to WKN 2.	161
12. MTSUWO	164
13. Pre-Notification	165
14. WKN/ ISIN Quotas.....	165
15. Company affiliations.....	166
16. Zero identifier	175
16.1. Definition	175
16.2. Current depiction.....	175
16.3. Future depiction	175
16.4 Relevant fields	176
17. New and old representation in segment D	180
18. Other changes (Splitting and merge of existing fields)	184
19. Abolition of BID 91	207
20. IBOR	207
20.1. Introduction	207
20.2. Functionality.....	207
21. Concept for the presentation of interest phases / floater.....	209
21.1. Introduction	209
21.2. Functionality.....	209
21.3. Detailed field description of the field structure.....	210

21.4. Overview of old fields	215
21.5. Example of field population (decode values)	217
22. ESG.....	219
22.1. Introduction	219
22.2. Functionality	219
22.3 Expansion of the MIFID II target market to include ESG preferences	219
23. Payment in kind.....	220
23.1. Introduction	220
23.2. Functionality	220
23.3. Detailed field description of the new field	220
24. Calls/Puts	222
24.1. Introduction	222
24.2. Functionality	222
24.3. Detailed field description of the new field structure	222
24.4. With the implementation of EDDy_neu the following fields are omitted	227
24.5. Field population example (decode values).....	229
25. Inactive financial instruments	230
26. Contacts	230

Change log

Chapter	Contents	Version
	Change log added	0.71
	Adjustment of section numbering from section 17 "New and old representation of segment D" onwards	0.71
	Adjustment of section reference 7 – Deletion reference to sections 2.5.3/2.5.4 f. – Reference to section headings	0.71
Chapter 6.1 and chapter 15	Specification of the representation of company affiliations	0.8
Chapter 7	Specification of the representation of ratings	0.8
Chapter 22.3 Extension of the MIFID II target market by ESG preferences	Extension of the MIFID II target market by ESG preferences	0.8

Chapter	Contents	Version
	(see also F01a from February 2021)	
Chapter 8 Text fields in T format / Supplementary text fields	Adjustments to the content (8.2 Adjustment note WM Hub + adjustment of the clause on GD998; 8.3 table: adjustment to HD192; 8.4 adjustment to ,text' + table: adjustment of the 998s variables; 8.5 table: adjustment of the text on KD087A)	0.8
Chapter 18 Other changes (Splitting and merge of existing fields)	Adjustment to the general description of substitute and adjustment + adjustment to field length to WM used representation	0.8
Chapter 13 AVIS – Pre-notification	Specification of the publication date	0.8
Chapter 14 WKN/ISIN quotas	Specification	0.8
Chapter 21 Concept for the presentation of interest phases / floater	Specification of the option to choose between old and new fields	0.8
Chapter 4 Representation of market places	Specification of the representation of market places	0.8
Chapter 5. Conversions/exchanges (Renaming of the chapter to “Master data on thresholds and redemptions”	Adjustment Note on the Special Information issue, Correction of the June Release for the provision of field GD189B	0.8
Chapter 16. Zero identifier	Specification of the usage of keys	0.8
Chapter 1	Note to the depiction of variables under VFX and VF1	1.0
Chapter 6 and chapter 15	Representation of the delivery in format VF1	1.0
Chapter 15	Concretization of the keys for the depiction of the company affiliations, concretization of the deactivation of fields	1.0
Additions to chapter 6.3.1	Cancelled fields at instrument level	1.0
Chapter 8.2 and 8.5	Depiction of the delivery in VF1 format	1.0
Chapter 8.2	Supplementary description of the URL for the WM Hub	1.0

Chapter	Contents	Version
Chapter 18	Depiction of the delivery in VF1 format	1.0
Chapter 7	Concretization of the deactivation of fields	1.0
Chapter 16 Zero identifier	Concretization of the use of keys	1.0
Various chapters	Addition of further fields due to field limitations under VF1.	1.0
Chapter 6.1 and 15	Adoption of EKN as identifier for the representation of company affiliations and additional examples	1.1
Chapter 8.5 and 24	Adjustments to fields in the area of termination including the updating of examples	1.1
Chapter 10.2.5	Adjustments to the deleted field ED311	1.1
Chapter 11	Several adjustments	1.1
Various chapters	Adjustment to the Go-Live_date of EDDy_neu to 04/2023	1.2
Various chapters	Due to numerous customer requests, there will be various adjustments to field formats/lengths, especially in the address data on ISO20022. Part 1	1.3
Various chapters	Due to numerous customer requests, there will be various adjustments to field formats/lengths, especially in the address data on ISO20022. Part 2	1.4
Chapter 2	<ul style="list-style-type: none"> - Addition to the customer number description / definition of the customer number (inclusion of document D36 in D20) - Legal entities always receive an EKN (issuer ID), even if they are not yet an issuer. 	1.5
Chapter 4	- Revision of chapter 4 to add the optional functional extension and the variables for	1.5

Chapter	Contents	Version
	depicting the trading venues and the trading segments.	
Chapter 8.2	<ul style="list-style-type: none"> - Display of the optional text fields: ED650, HD650, KD650 and UD650 in format T (inclusion of document D40 in D20) - Correction of the format lengths of fields UD087E, KD131A, ED087D, and HD142B from 300 to 38 characters - Fields UD087F (for UV256O) and KD131B (for KV089N) have been implemented to display the complete linking in the table subfields in the delivery format VF1. - Correction of field WV467S to EV467S - Correction of field EV4660 to EV466O - Due to various customer comments, the demand for information on shareholders' meeting documents was taken into account and the variable HD142C has been implemented. 	1.5
Chapter 8.5	<ul style="list-style-type: none"> - Inclusion of the keys "AN", "AO", "AP", "AQ" and "AR" in table UA6 - Inclusion of the keys "AL", "AM" and addition of the keys "AI", "AJ", "AK" in table UA9 - Inclusion of the keys "J", "K" and "L" in table UB2 - Addition of keys "AH", "AI" and "AJ" in table UB8 - Inclusion of keys "K" and "L" in table FM1 - Supplementary representation of the marking of a negative interest rate via GD802H 	1.5

Chapter	Contents	Version
	- Inclusion of key "AZ" in table UA1	
Chapter 10.2.1	- Correction of the field length of the table sub-variable EV604A to "04"	1.5
Chapter 10.2.2	- Correction of the field length of the table sub-variable VV132A to "04"	1.5
Chapter 10.2.3.	- Correction of the format of KV126C to "N". - Correction of the field lengths of the table sub-variables KV126A, KV128A, KV130A to "04"	1.5
Chapter 10.2.4	- Inclusion of the key "03" in table E29 - Addition of table GG2 for field UV250E - Correction of the field lengths of the table sub-variables UV246A, UV248A, UV250A, UV252A to "04"	1.5
Chapter 11.2.1	- Addition of the term "cancellation notice" for delivery identifier 8	1.5
Chapter 11.5.1	- Correction of field GV302 to UV302	1.5
Chapter 11.5.3	- Removal of field UD002 as this is no longer applicable according to chapter 10.2.5. - Addition of VFX fields from chapter 18 (UV255B, UV255D, UV255E, UV255G, UV255M, UV255N) to the table. - Correction of table UV302 by implementation of sub-variable UV302I - Addition of VFX System_Names for components and variables of the fields UV302, UV302A, UV302B, UV302C, UV302D, UV302E, UV302F, UV302G, UV302H and GD153A	1.5

Chapter	Contents	Version
	- Removal of the WM field UD099 used for internal purposes only	
Chapter 11.10.1 to chapter 11.10.5	- Additions to the examples to provide information which variables are relevant for VFX/ VF1 as well as addition of table UV255	1.5
Chapter 16.4	- Completion of the relevant zero identifier fields by including EV308B, GV1C7E, GV1D0C, GV1D1C, GV1D2C, GV1D3C, GV233D, GV238D, GV239D, GV310C, JV001F, JV002F, JV003F, JV004E, JV005D, JV005F, JV005H, JV006F, KV036C, KV085E, and UV085E	1.5
Chapter 18	- Correction of field K021PI to KD021PI - Addition of further explanations for the depiction of table UV217 - Correction of table VV131 by adding a numerator and denominator via the fields VV131G and VV131H - Inclusion of the keys "D", "E" and "F" in table UB4 - Inclusion of the key AZ in table "UA1"	1.5
Chapter 21.3	- Correction of field GV749 to GD749	1.5
Chapter 22.3	- Note that the current keys are to be taken from the WM-Dok	1.5
Chapter 24.3	- Addition of two decodes for GV1F51	1.5
Various chapters	Change of the WM-SRD Hub name to "WM Hub".	1.5
Chapter 5	- Due to various customer feedback, the WKN was added as an option to the ISIN in the table variables GV1E3L, GV1E4I and GV1E6H.	1.6

Chapter	Contents	Version
Chapter 8.5	- Concretisation of the variable of GD802H	1.6
Chapter 16.3	- Due to various customer feedbacks there are exceptions for the fields ED476B and ED476E	1.6
Chapter 18	- Correction of the length for VD013F to 9.9 - Due to various customer feedback, the WKN was added as an option to the ISIN in the table variable/linkage VV1311 - Correction of table UV085 by WKN (UV085I) and ISIN (UV085J) - Due to various customer feedback for the atble variables/linkages Corporate operations (tax) the field/variable UV254E was adjusted by UV254G - Concretisation of the variable definition of GV1E7	1.6

1. Data structure adjustments in the context of EDDy_neu

This document describes the changes related to the introduction of EDDy_neu. Under certain circumstances, topics will already be made available through Release changes prior to the go-live of EDDy_neu. Please refer to our Customer Information issues for more details on the relevant Releases. If you have any technical questions on EDDy_neu, especially about the pre-production, parallel phase and products as well as on the data delivery to WM, please refer to the relevant EIC documents.

All changes mentioned in this document will become effective with the go-live of EDDy_neu at the latest. The respective individual go-live date, which takes place within the framework of the parallel phase, will then apply.

Please note that there are new variables that cannot be delivered in VF1 due to technical restrictions (maximum length of linkage subfields). Additional variables have therefore been created for this purpose. In the VFX format, there is no restriction in this respect. For easier identification, the "corresponding" field ID is listed next to the VFX variable name. If variables in the respective chapters are affected by this, this will be indicated accordingly.

The fields and variables mentioned in this document which will be changed are listed in tabular form with their respective relationship in the separate document DE20_E "D20_Supplement_Field_Matrix".

Note for the following documentation:

The terms "FieldIdent" and "Variable-ID" are used synonymously. However, under EDDy_neu the language usage will change insofar as the term "Variable-ID" will replace the known term "Field-ID" or "FieldIdent".

2. Customer number / WM issuer identification number

Note: In the following, the term "legal entity" shall also subsume special assets in regard to funds.

Issuers are currently depicted in segment M. For this purpose, each issuer receives its own number (= EKN). With the introduction of EDDy_neu however, the issuer identification number will be replaced by a new customer number. The new customer number remains unchanged and unique until the company ceases to exist (e.g. through a merger or deletion from the commercial register). This procedure corresponds to the allocation of a Legal Entity Identifier (LEI). Once a customer number has been assigned, it will not be reassigned.

The new number has a 38 digit alphanumeric format, which is composed as follows:

1. Issuer Identification Number, 6 numeric digits (EKN) +
2. Legal Entity Identifier, 20 alphanumeric digits (LEI) +
3. Settlement agent number, 4 numeric digits (if available) +
4. Numerator, 8 numeric digits

The first 6 digits of the customer number can also be populated with 000000, ~~if the customer is not an issuer at the time of the entry into the customer database.~~ if the customer is a natural person. Legal entities will always include an issuer ID (EKN) in the customer number until further notice.

Also, the next 20 digits may contain alphanumeric information that does not correspond to the official LEI, if not available at the time of the entry into the customer database.

The number is depicted in the customer database via the following field:

Variable ID	Variable name
MD851P	Customer ID

A reference to the data of the issuer is established at the level of the financial instruments:

Variable ID	Variable name
GD230J	Customer ID

2.1. Issuer identification number

Currently, issuers are sometimes added to segment M more than once. This can have different reasons, which are not clearly defined and can therefore lead to legal duplicates. For example, subsidiaries are depicted as separate issuers, although they are not legally independent. The old issuer identification numbers remain in EDDy_neu to the extent that they are assigned to the legally independent person. This creates a legal entity with a new customer number, possibly with several issuer identification numbers (= "1" legal entity and "n" issuer identification numbers). For the customer number each issuer receives a leading issuer identification number, which is part of the customer number.

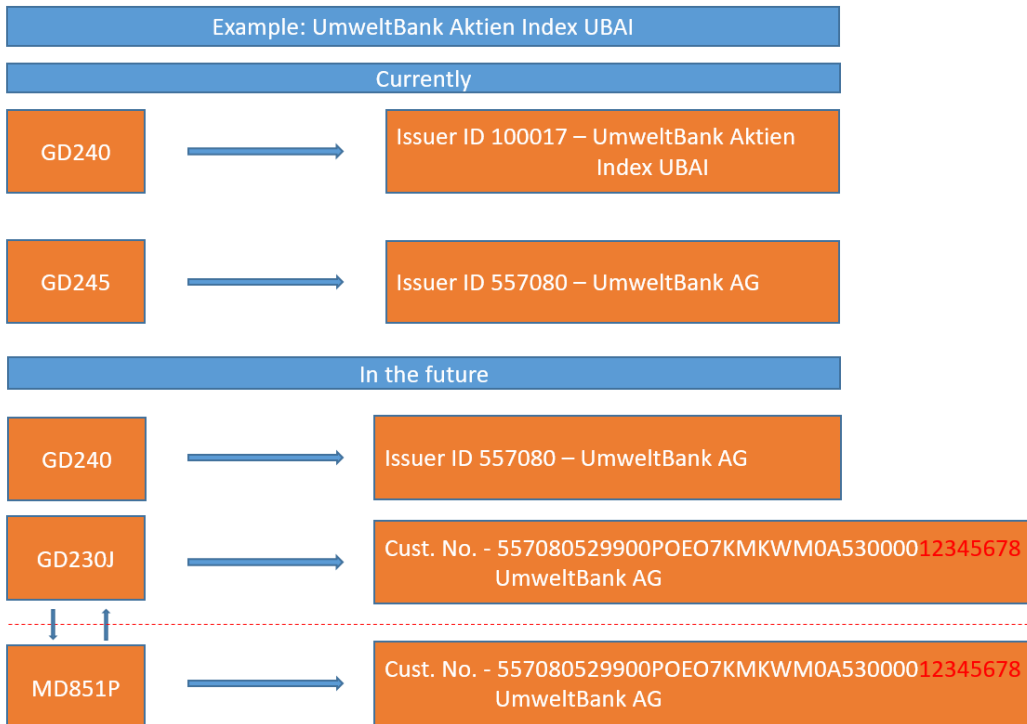

In the future, the issuer identification numbers of a legal entity will be depicted in the identifier component as follows:

Variable ID	Variable name
MV876	Reference EKN
MV876A	EKN

All issues that WM adds to the database before the Go Live of EDDy_neu will receive EKNs in accordance to the current procedure or the existing EKNs will remain on the financial instruments as a reference to segment M in fields GD240, GD241 and GD245. All existing EKNs of an issuer are depicted under the customer number in MV876A. Financial instruments which are added to the database from 31.12.2021 only receive the leading issuer identification number of the legal entity.

With the introduction of the customer number, indices will be assigned to the index owner.

Please see the following example

2.2. Legal Entity Identifier

Each issuer or legal entity requires principally a Legal Entity Identifier. It is included in the new customer number and is the officially assigned LEI in accordance with ISO 17442 if it is available at the time of the entry of the customer into the customer database. It is irrelevant by which allocation agent the LEI has been assigned. However, in practice, it may happen that the official allocation of an LEI and the allocation of a customer number overlap, i.e. when a new customer number is created, there is not yet an official LEI. In this case, WM assigns a separate LEI (internal LEI) for the customer number. This LEI will not be changed once an official LEI has been assigned, as the customer number may no longer change. If the legal entity receives an LEI from the allocation agent of WM (LOU: 5299), this internal LEI automatically becomes the official LEI in accordance with ISO 17442. For further information on the LEI, please visit our website: <https://www.wm-leiportal.org/>.

The LEI will continue to be depicted in the client database with the known information:

Variable ID	Variable name
MD609	LEGAL ENTITY IDENTIFIER (LEI)
MD609D	LEI VALIDITY DATE TO
MD609B	LEI STATUS IDENTIFIER

2.3. Settlement agent number

The four-digit settlement agent number is currently depicted on the respective financial instruments, e.g. in field GV995. When a new customer is created, 0000 is assigned to the relevant 4 digits in the customer number. The existing numbers of the settlement agents are only adopted to the customer number and in the customer database during the migration of the old portfolio. If a legal entity has several settlement agent numbers, the same rule applies here as for the issuer identification number. For the customer number, each issuer receives a leading settlement agent number, which is part of the customer number.

In the future, the settlement agent number will be depicted in the customer database under the subsidiaries component:

In delivery format **VFX**:

"Corresponding" Variable ID New	Variable Name New	Format	Length	Table
MV867	SETTLEMENT AGENTS	U	00	Div.
MV867A	SETTLEMENT AGENT NO	N	04	./.
MV867B	BANK IDENTIFIER CODE(BIC)	X	11	./.
MV867C	BANK CODE (BLZ)	N	08	./.
MV867D	COUNTRY OF BRANCH	X	02	L02
MV867E	PLACE OF BRANCH	X	Old: 117 New: 35	./.
MV867F	STREET OF BRANCH	X	Old: 117 New: 70	./.
MV867G	HOUSE NUMBER OF BRANCH	X	Old: 30 New: 16	./.

In delivery format **VF1**:

Variable ID New	Variable Name New	Format	Length	Table
MV882	SETTLEMENT AGENTS	U	00	Div.
MV882A	SETTLEMENT AGENT NO	N	04	./.
MV882B	BANK IDENTIFIER CODE(BIC)	X	11	./.
MV882C	BANK CODE (BLZ)	N	08	./.
MV882D	COUNTRY OF BRANCH	X	02	L02
	PLACE OF BRANCH (1)		Old: 39	
MV882E		X	New: 35	./.
MV882F	PLACE OF BRANCH (2)	X	39	./.
MV882G	PLACE OF BRANCH (3)	X	39	./.
MV882H	STREET OF BRANCH (1)	X	39	./.
	STREET OF BRANCH (2)		Old: 39	
MV882I		X	New: 31	./.
MV882J	STREET OF BRANCH (3)	X	39	./.
			Old: 30	
MV882K	HOUSE NUMBER OF BRANCH	X	New: 16	./.

2.4. Numerator

The numerator is a number, which is required internally for the technical avoidance of duplicate customer numbers. It is part of the customer number and is added at its end.

2.5. Examples

Current depiction:

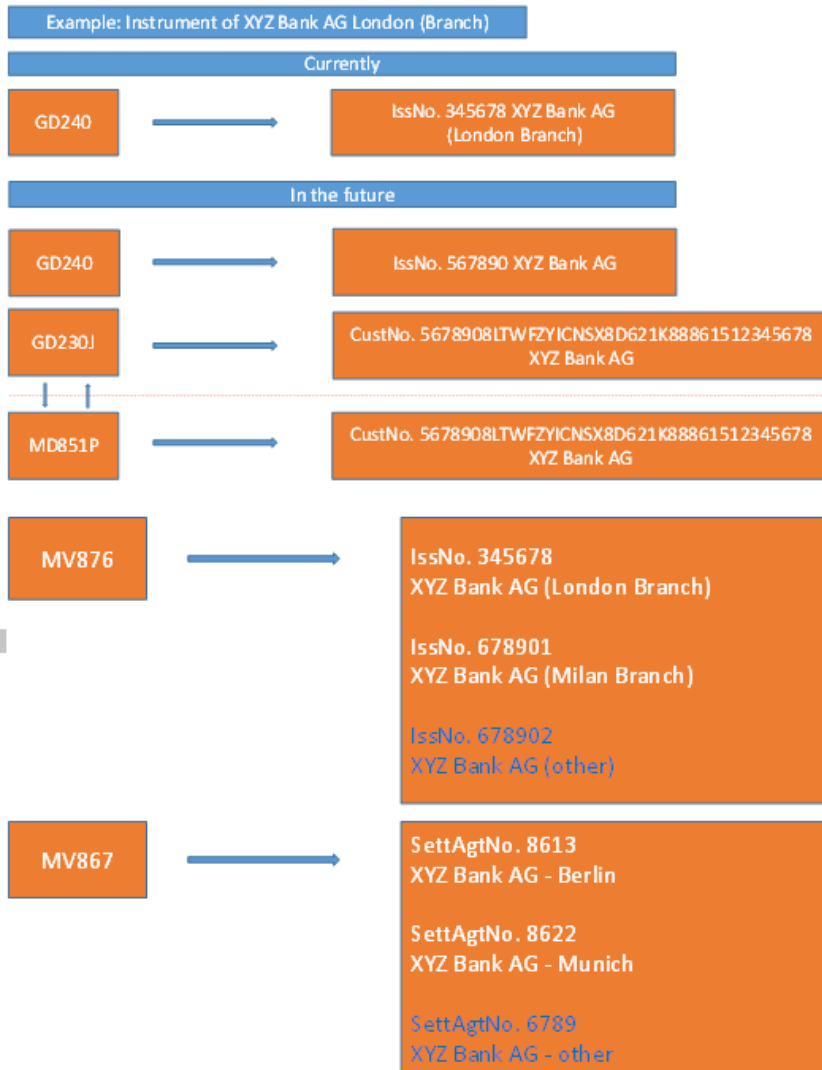

1. **"Legal entity"**: ABC Bank AG, subsidiary Hamburg (in segments M and AG G)
 2. **Issuer identification number (EKN)**: 398888 (in segments M and AG G)
 3. **Settlement agent number**: 3451 (e.g. GV995 in segment G)
-
1. **"Legal entity"**: ABC Bank AG *Filiale München* (in AG M und AG G)
 2. **Issuer identification number (EKN)**: 888888 (in AG M und AG G)
 3. **Settlement agent number**: 5789 (e.g. GV995 in AG G)
-
1. **"Legal entity"**: ABC Bank AG subsidiary Frankfurt a. M. (in segments M and G)

2. **Issuer identification number (EKN):** 555666 (in segments M and G)
3. **Settlement agent number:** 4444 (e.g. GV995 in segment G)

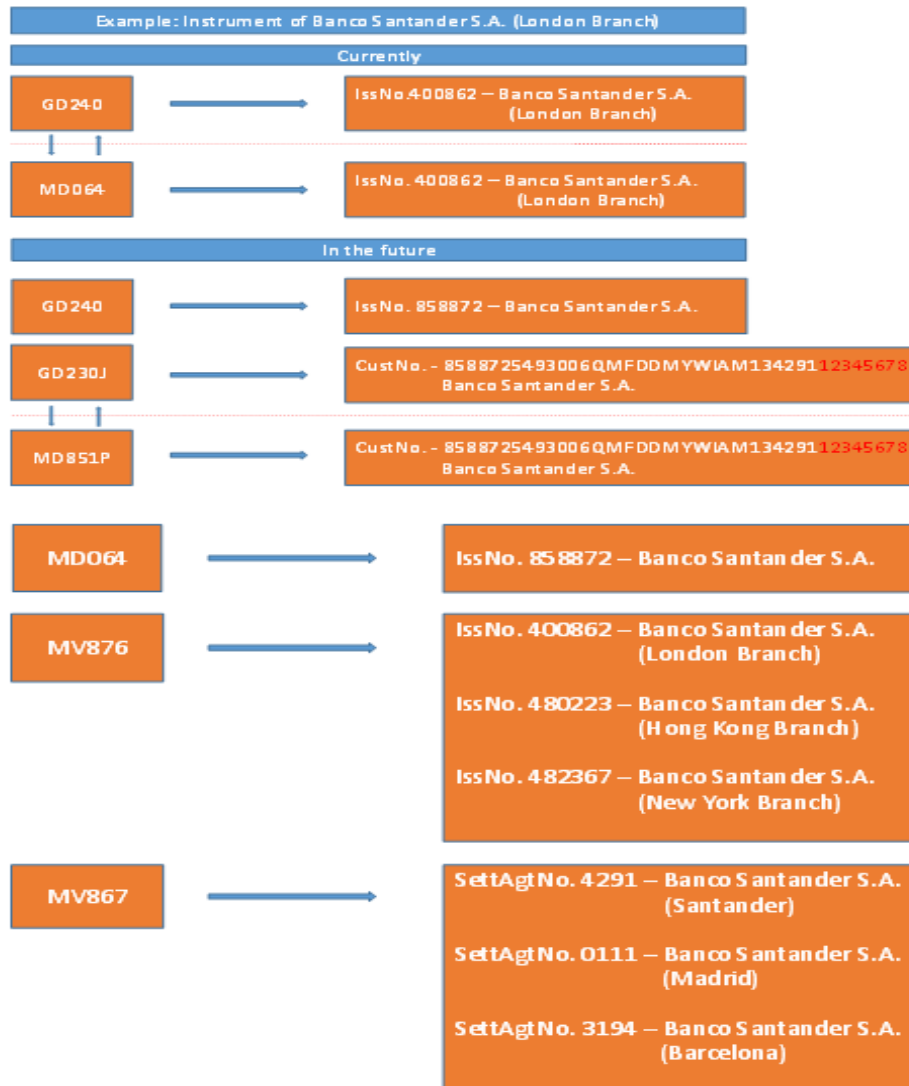

New depiction under EDDy_neu (red means leading issuer number and leading settlement agent number):

1. **Legal entity:** ABC Bank (AG M)
2. **Customer number:** 398888529900R27DL06UVNT076345100334513 (AG M)
3. **EKNs (Segment M)**
 - 398888
 - 888888
 - 555666
4. **Settlement agent number (Segment M)**
 - 3451
 - 5789
 - 4444

For illustration, here is a fictitious graphical example from the perspective of an instrument:

For further illustration, here is a concrete graphical example from the perspective of an instrument:

The following text provides the content of the previously published document D36 from the EIC.

Definition of the customer number

EDDy_neu will introduce a new number for the identification of issuers. The number will replace the existing issuer identification number in the future (EKN). The so-called customer number fulfils several tasks and is generated in a customer database. Firstly, the existing EKN is finite and will no longer be sufficient in the near future to cover the in-creasing number of issuers. Furthermore, the customer number is uniquely assigned to a legal entity. Legal entities that are not independent will not receive their own customer number. Thus, the customer number will be the leading identifier for future products and fulfils any requirements with regard to KYC or regulatory issues, such as due diligence with regard to customers, which are regulated in the Money Laundering Act. The existing EKN has not been able to fulfil this purpose fully in the past. If necessary, EKNs were also assigned to entities that were not legally independent (e.g., branches). In addition to the issuers, the LEI reference data will be held in a consolidated form in

the customer data-base. As a result of this harmonization, WM customers will, in the future, automatically receive the accredited data of WM as the official LEI Allocating Agency.

Important: Once a customer number has been assigned, it can no longer be changed.

Structure of the customer number:

EKN + LEI + settlement agent number + counter (38 characters, alphanumeric)

1. EKN (MD064)

To simplify the transition to the new customer number, each customer number is preceded by a primary 6-digit EKN (numeric). Primary in this context means that the EKN of the legally independent entity that is recorded in the current issuer database is used. All other EKNs of an issuer will still continue to exist and will be stored in the customer database with the legally independent entity (MV876). After the go-live of EDDy_neu, EKNs will continue to be assigned as long as the number range is sufficient. Customers who are not yet issuers also receive an EKN. Legal entities and special funds thus receive an EKN directly, even if the issuing activity is not started until a later date. The EKN is depicted directly in the customer number. Natural persons do not receive an EKN.

The primary EKN is propagated to the associated financial instruments and captured in GD240 provided the legal entity is an issuer.

2. LEI (MD609)

When a new customer account is created in the customer database, it is always determined whether an LEI (alphanumeric, 20 characters) already exists for this legal entity. If an official LEI of an LEI allocating agency exists, it will be included in the customer number. In this case, it is irrelevant which LEI allocating agency has issued the LEI. If no official LEI exists, WM assigns its own internal LEI and includes it in the customer number. In this constellation, MD609 = BLANK. If the customer subsequently receives an official LEI from WM, the internal LEI automatically changes and is used as the official LEI. This again expedites the LEI issuance process enormously, as the LEI status only needs to be changed from internal to external. All LEI issuing bodies are identified by their 4-digit LOU identifier (WM: 5299). This means that every LEI that begins with the numbers 5299 has been assigned by WM Datenservice. Accordingly, customers with other LOU identifiers in the customer number have received their LEI from another official allocating agency. No internal LEI is assigned to these customers. Consequently, the LEI in the customer number can always be used for these customers (without having to check other characteristics) as it has officially been allocated by another LEI allocating agency.

3. Settlement agent number (MV867)

The four-digit, numeric settlement agent numbers of a legal entity are provided in field MV867. Already existing settlement agents keep their number and are aggregated at the

legal entity. Consequently, for new customers who do not yet have a settlement agent number, the customer number is filled here with four zeros.

4. Counter

Each customer is assigned a consecutive counter (numeric, 8 digits) in the customer database, which increases linearly by one with each new customer. The counter is unique and is assigned to one customer each. The counter is not depicted in a separate field.

3. Dummy WKN

Definition:

A dummy is a placeholder or a variable not needed for the time during programming. In the WM database this is clearly represented by the field GD198B/ variable "product group" with a key.

8100 Dummy WKNs

There are dummies, e.g. for the following financial instruments:

- for Eurex products
- base value as placeholder for the so-called "cover"

Dummies as technical support:

- bracketing of information
- reference information

The following dummies are available in the WM database, subdivided according to their functions:

Substitute (placeholder) for an unknown information,

for the WKN or ISIN of a financial instrument

WKN	ISIN	Description
A0G9BV	XC000A0G9BV1	techn.WKN underlying research
A1MLDN	DE000A1MLDN5	techn.WKN for CLN (Credit Linked Notes)
A1A4P6	DE000A1A4P63	techn.WKN for base values (Futures)

or for components (e.g. in the case of indices for factor certificates)

WKN	ISIN	Description
A1PHHS	DE000A1PHHS6	Dummy WKN for fees
A1PHHT	DE000A1PHHT4	Dummy-WKN for interest components

Bracketing of information:

WKN	ISIN	Description
989999	XC0009899995	Technical WKN for baskets
A0G9BU	XC000A0G9BU3	Techn.WKN f.unspec.baskets/ind.

Reference information

WKN	ISIN	Description
969980	DE0009699801	Domestic/foreign and futures exchanges
A1EZKU	DE000A1EZKU2	techn.WKN settlement calendar

Transporter of Release information (WM Master file)

WKN	ISIN	Description
969969	DE0009699694	Dummy WKN f. WM information gen. Inf. WM master file

The dummy with the WKN "969969" is a transporter of technical instructions for the processing of data of the so-called WM-DOK for the respective Release. In this regard, will provide you further information in a separate documentation.

4. Depiction of market places

WM Datenservice will continue to provide all listing data from Segment X or the Stock/Futures Exchanges and Trading Practices (OHC) product at the financial instrument level and will not make any changes here.

Accordingly, these data records will continue to contain, for example, address information and classification features relating to the trading venues and trading segments. Likewise, the known information in the dummy WKN "969980" will be provided until further notice.

As an optional functional extension, we will offer the relational representation of relevant information concerning the relationship between relevant customer data, trading venue data, trading segment data, and financial instrument data.

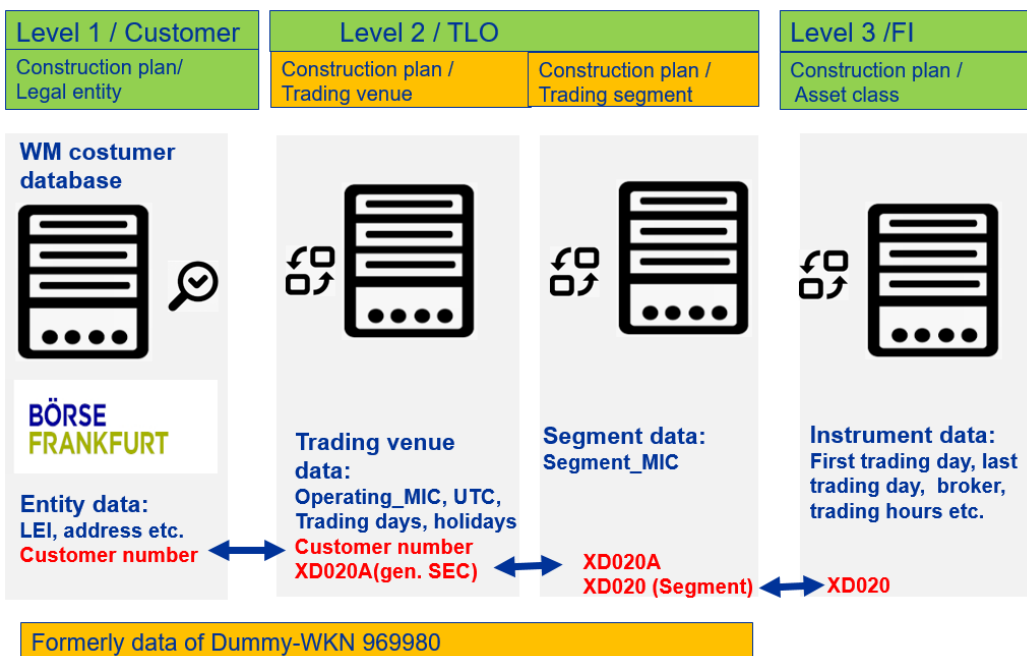

The customer data or entity data reflect the relevant information of the trading venue operator. A trading venue is potentially assigned several trading segments (usually Regulated Market and Multilateral Trading Facility (MTF)).

This

- establishes the relationship between the identifiers ISIN, LEI and MIC known from the regulatory system and
- allows the storage of the exchange data on separate construction plans, whereby
 - the basically static data are no longer displayed within the financial instrument itself and mass data changes are therefore NO LONGER required when updating stock exchange holidays or UTC (keyword: summer and winter time with changes of > 5 million listing data records) and
 - no special files have to be read in because of the mass data changes.

By implementing a new TopLevelObject (TLO) in level 2, the relational representation of the trading venues is as follows:

~~In addition to the use of the dummy WKN "969980", a new top-level object Stock Exchanges will be introduced as a reference for higher level data (among include e.g. market holidays (GV953)). The market places are therefore depicted as follows:~~

In this way, the information is stored singularly in the relevant level and passed on to the subsequent levels. This means that redundant storage can be dispensed with in the future (e.g. address data at level 3 of the financial instrument (FI)):

Level 1/ Customer	Level 2/ Trading place and segment data		Level 3 /FI
Customer data			Financial instruments
Construction plan / Legal entity	Construction plan / Trading venue	Construction plan / Trading segment	Construction plan / Asset class
Component: Identifiers Variables: <ul style="list-style-type: none"> LEI Customer number 	Component: Identifiers_TV Variables: <ul style="list-style-type: none"> General stock exchange key Operating_MIC Customer number reference 	Component: Identifiers_TS Variables: <ul style="list-style-type: none"> Stock exchange and/or stock exchange main segment Segment MIC General stock exchange key reference 	Component: Identifiers Variables: <ul style="list-style-type: none"> Stock exchange and/or stock exchange main segment reference Various components with variables on: First trading day, last trading day, broker, trading hours etc.
	↔ 1:n	↔ 1:n	↔ 1:n

The Trading Venues and Trading Segments are represented by two new construction plans.

The corresponding variable "T" will be assigned to the new Segment "Trading Venues" and variable "S" to the Segment "Trading Segment". The variables will be provided in the WM Dok with the Major Release in June 2022.

The relational representation allows a data transfer from the listing data record to the customer, Trading Venue or Trading Segment.

Data relocation from the listing data record

The identification is done via the key of WM table G32 (home/foreign exchange) which is subdivided into the tables "TV1 Trading Venue" and "TS1 Trading Segment" and is the central ID for the access code in the VF1 specifications.

Delivery in the VF1 format will be subject to the "Main Features of the Specification of the Future VF1 Format" as published in document D5 on the EIC. In the following, the functional extensions for the representation of the trading venues are shown.

The future sorting of the VF1 file in EDDy_neu is done in ascending order based on the elements contained in the access code. The 38-character access code in the VF1 file represents the unique addressing/path to the individual information:

At the TradingVenue level:

1. Segment (AG) (character 1)
2. Stock exchange key (characters 2-4)
3. Blanks (characters 5-19)
4. Sorting indicator (character 20, uniformly set to "0")
5. Reference identification (BID) (characters 21-32) (is uniformly set to "0000000000")
6. Delivery indicator (LKZ) (character 33)
7. Record sequence number (characters 34-38)

In the case of the user data (the fields and their field contents), the sorting is done in ascending order according to the field IDs.

At the TradingSegment level:

1. Segment (AG) (character 1)
2. Stock exchange key (characters 2-4)
3. Blanks (characters 5-19)
4. Sorting indicator (character 20, uniformly set to "0")
5. Reference identification (BID) (characters 21-32) (is uniformly set to "0000000000")
6. Delivery indicator (LKZ) (character 33)
7. Record sequence number (characters 34-38)

In the case of the user data (the fields and their field contents), the sorting is done in ascending order according to the field IDs

For a better representation, the individual elements of the access code are stretched apart and framed in color. The "blank" in the LKZ column is represented by an underscore (_).

AG T/ TradingVenue

5. Master data on thresholds and redemptions (formerly conversions/exchanges)

Currently, the relevant master data on thresholds and repayments for warrants, certificates, reverse convertible bonds, and bonds with a certificate-like structure are depicted textually in WM fields GD924 [REDEMPTION PRICE DEPENDENCY] and GD982 [CONVERSION OR OPTION TERMS]. In addition, this "extended master data" is provided redundantly in the UMT (Conversions/exchanges) Segment.

In the future, the information on "Ratio and start value", "Thresholds", "Amount types", "Deviating instrument to be delivered", "Settlement type" and "Participation factor" will be delivered exclusively in the structured fields/variables.

From June 2021, the field contents for the thresholds and repayment amounts will be successively developed in the new fields. The maintenance will be completed by 31 December 2021 at the latest.

The conversion will be carried out for the financial instruments with the following coding in field GD198B

- 3000 warrants

- 4000 certificates
- 2800 bonds with certificate-like structure
- as well as convertible bonds with GD198C = 2031.

Upon the launch of "EDDy_neu" the texts for the fields GD924 and GD982 will be frozen and no new texts will be produced.

In the following you find the overview of the new fields/variables and their values:

Field ID	Field/variable	Format	Length	Table	Old field
GV1E3	RATIO AND START VALUE	U	00	Div	
GV1E3A	THRESHOLDS/RATIO – SEQUENTIAL NUMBER	N	06	./.

GD924H	PARTICIPATION FACTOR IN PERCENT	N	4,9	./.	

For all warrants, certificates, reverse convertible bonds, and bonds with a certificate-like structure, a basic data set consisting of the following fields/variables is provided. The field assignment depends on the respective features of the financial instrument.

The representation differentiates between the old data delivery VF1 (variant A) and the new delivery formats under EDDy_neu (variant B).

Variant A:

Field ID	Field/variable
UD001	EXCHANGE STATUS
UD002A	CONTENT STATUS
UD005	NUMBER OF EXCHANGE OPTIONS
UD007	CONVERSION, CASH COMPENSATION OR PAYMENT METHODREASON FOR EXCHANGE
UD078	EXERCISE TYPE
UD087	CORPORATE EVENT IDENTIFIER (ANNUAL CERTIFICATE)
UD230	CLUSTER CORPORATE ACTIONS MATRIX

Variant B:

Variable ID	Feld/Variable
UD001	EXCHANGE STATUS
UD002A	CONTENT STATUS
UD005	NUMBER OF EXCHANGE OPTIONS
UD007C	EXCHANGE/COMPENSATION/PAYMENT MODE

Variable ID	Feld/Variable
UD007D	EXCHANGE/COMPENSATION/PAYMENT ENTRY
UD007E	EXCHANGE/COMPENSATION/PAYMENT/ SELECTED INSTITUTION
UD008A	EVENT TYPE
UD078	EXERCISE TYPE
UV254	CORPORATE EVENTS (TAX)
UV254A	CONSECUTIVE NUMBER
UV254B	CORPORATE EVENT IDENTIFIER (ANNUAL CERTIFICATE)
UV254C	CLUSTER CORPORATE ACTIONS MATRIX
UV254E	<p>OLD: REFERENCE TO OPTION NUMBER UV217OLD:</p> <p>NEW: REFERENCE TO SEQUENTIAL NUMBER UV217A_UV255A</p>
UV254F	CANCELLATION ID
UV254G	USAGE KEY CORPORATE EVENTS

The specific field population depends on the corresponding features of the financial instrument.

Below is an example of the population logic of a discount certificate:

Field ID	Field/Variable	Old field	DE000VQ2RKG0 // Discount certificate
GV1E3	RATIO AND START VALUE		
GV1E3A	THRESHOLDS/RATIO – SEQUENTIAL NUMBER		1
GV1E3B	ISIN UNDERLYING	UD021PI	EU0009658426
GV1E3C	THRESHOLDS/RATIO – RATIO NUMERATOR GERMAN	UD010D	1
GV1E3D	THRESHOLDS/RATIO – CURRENCY/ UNIT/TOKEN RATIO NUMERATOR	UD010A	ST Unit
GV1E3E	THRESHOLDS/RATIO - RATIO DENOMINATOR GERMAN	UD011D	1
GV1E3F	THRESHOLDS/RATIO – CURRENCY/ UNIT/TOKEN RATIO DENOMINATOR	UD011A	PT Points

Field ID	Field/Variable	Old field	DE000VQ2RKG0 // Discount certificate
GV1E3G	CURRENCY/UNIT/TOKEN OF THE THRESHOLD	UD022A	PT Points
GV1E3H	START VALUE		72.51
GV1E3I	START VALUE DATE FROM		22.12.2020
GV1E3J	START VALUE DATE TO		00.00.0000
GV1E3K	THRESHOLD AND RATIO – CANCELLATION IDENTIFIER		
GV1E4	THRESHOLDS		
GV1E4A	THRESHOLDS- SEQUENTIAL NUMBER		1
GV1E4B	ISIN UNDERLYING	UD021PI	EU0009658426
GV1E4C	THRESHOLD TYPE		CA Caplevel
GV1E4D	THRESHOLD VALUE	UD022D	65
GV1E4E	THRESHOLD VALUE IN PERCENT		
GV1E4F	THRESHOLD MONITORING PERIOD START	[UD016]	17.12.2021
GV1E4G	THRESHOLD MONITORING PERIOD END	[UD016]	17.12.2021
GV1E4H	THRESHOLDS AND RATIO – CANCELLATION IDENTIFIER		
GV1E5	AMOUNT TYPE		
GV1E5A	AMOUNT TYPE – SEQUENTIAL NUMBER		1
GV1E5B	AMOUNT TYPE		01 Cap amount / maximum amount
GV1E5C	AMOUNT	UD065	65
GV1E5D	CURRENCY/UNIT/TOKEN AMOUNT	UD066	EO Euro
GV1E5E	AMOUNT TYPE – CANCELLATION IDENTIFIER		
GD924E	FULFILLMENT TYPE	UD061	5 Complex fulfilment

Field ID	Field/Variable	Old field	DE000VQ2RKG0 // Discount certificate
GD924G	PARTICIPATION FACTOR		
GD924H	PARTIZIPATION FACTOR IN PERCENT		
GV1E6	DEVIATING INSTRUMENT TO BE DELIVERED		
GV1E6A	DEVIATING DELIVERY INSTRUMENT – CONSECUTIVE NO.		1
GV1E6B	ISIN DEVIATING INSTRUMENT TO BE DELIVERED	UD089PI	DE0006289309
GV1E6C	RATIO – RATIO NUMERATOR GERMAN	UD089A	1
GV1E6D	RATIO - CURRENCY/UNIT/TOKEN RATIO NUMERATOR	UD089B	ST Unit
GV1E6E	RATIO – RATIO DENOMINATOR GERMAN	UD089C	1
GV1E6F	RATIO - CURRENCY/UNIT/TOKEN RATIO DENOMINATOR	UD089D	ST Unit
GV1E6G	DEVIATING INSTRUMENT TO BE DELIVERED – CANCELLATION IDENTIFIER		
GV1E6F	RATIO - CURRENCY/UNIT/TOKEN RATIO DENOMINATOR	UD089D	ST Unit

More examples were published in our Special information issue F13/ 2021.

Currently, the following fields/variables are offered for the classification of securitized derivatives:

- GD198A-G EFIC [ENHANCED FINANCIAL INSTRUMENT CLASSIFICATION]
- GD685 CLASSIFICATION OF FINANCIAL INSTRUMENTS (CFI) CODE as per ISO standard 10962
- GD189A WARRANT SEGMENTATION

In addition, field GD189B TYPISATION OF STRUCTURED PRODUCTS will be published with the June 2021 Release. In this field, due to the assessment of WM, a more detailed classification will be made based on the repayment terms. Possible values are among others:

- Discount plus
- Reverse convertible bonds plus
- Inline Warrants (range with K.-O.)

6. Segment M - Issuer data

Under EDDy_neu, there will be changes in Segment M. Please also take into consideration the information provided on the other segments or operations, as some topics are interconnected and cannot be considered separately (see in particular the details regarding the “customer number/WM issuer number”).

In the future, Segment M will be depicted in EDDy_neu in a so-called customer database. Accordingly, all issuers together with the relevant information will be recorded there.

One of the new features will be the separation of the issuer ratings from the financial instruments (i.e., this data will no longer be provided for the financial instruments by the issuers). As there are no plans for a historization of the data, there will also be no “generations” of customer data available under EDDy_neu. Instead, the depicted data will always be the one currently valid. This again allows the deletion of field MR031 (see “Information/fields in Segment M that are omitted”).

With the introduction of the customer database, the following constellations can arise:

1. Information/fields are deactivated in Segment M and replaced by new fields in Segment M.
2. Information/fields are deactivated within the financial instruments. In the future, the information will only be in Segment M.
3. Information/fields in Segment M that are omitted.
4. Entirely new or additional information/fields in Segment M.

The fields that will be discontinued under EDDy_neu will be deactivated at the end of the parallel phase.

6.1. Information/fields are deactivated in Segment M and replaced by new fields in Segment M

The company affiliations will continue to be delivered at customer/issuer and instrument level. The previous fields in segments A and G are deactivated and replaced by new fields (see also the chapter [Company affiliations](#)).

Company affiliations are currently represented at the customer/issuer level in MVW646. This field will be replaced by the variable “company affiliations” (“corresponding” field_ID: MV065) in delivery format VFX or by MV069 in delivery format VF1.

In addition to the known presentation, the country of domicile is provided in addition to the affiliation type (immediate/nationwide/worldwide parent, the name of the affiliated company and the EKN, the customer number and the LEI. The EKN and the customer number will only be delivered , if the company is available in the customer database. In this case, if available, the LEI will also be delivered.

Variable ID	Variable name	Replacement by =>	VariableID	Variables name
MVW646 - incl. the corresponding linkage fields MVW646A to MVW646E	Company affil. V		MV065 (VFX) or MV069 (VF1)	Affil. §18 AktG

In the future, company affiliations at the customer/issuer level will be shown in the linkage MV065 (VFX) in the component Company Affiliations according to Section 18 of the German Stock Corporation Act (AktG) or in the linkage MV069 (VF1) in the component Company Affiliations according to Section 18 of the German Stock Corporation Act (AktG) and supplemented by the variables affiliation type, name, country, LEI, customer number and EKN of the affiliated company:

Depiction when delivery is carried out in **VFX format**:

Component	„Corresponding“ field ID	Variable name	Note

MDV835A to F	S&P Long-Term Local Currency Financial Strength Rating	

6.3.1. Information/fields that are deleted in Segment M and simultaneously deactivated at the financial instrument level.

The deletion includes the following fields:

MD702	BvD-ID
MD702C	BvD-Name
MD702D	GUO-ID
MD702E	GUO-Name
MD702F	GUO-Country

In Segment M, the fields at the financial instruments level in Segment G will also be deleted:

GD600	BvD-ID
GD600C	BvD-Name
GD600D	GUO-ID
GD600E	GUO Name
GD600F	GUO-Country

The fields will be deactivated at the end of the parallel phase.

6.4. Entirely new or additional information/fields in Segment M

6.4.1. Issuer ratings

In addition to the current representation of issuer ratings, a depiction without coding is added. As a result, the ratings are depicted 1:1, i.e., in the same manner as they are supplied by the rating agencies. Consequently, there is no need to convert the WM coding into the actual rating format. The new representation is provided for the ratings of the agencies Moody's, Fitch, and S&P and is mapped as a table (linkage) in individual components. For each individual rating type, there is a separate row entry. The representation thus includes a maximum of 4 entries per ISIN and per rating module of the individual rating agencies.

Component	Variable ID	Variable name		Note															
Moody's issuer rating	MV872	MoodyRatIss																	
	MV872A	RatingType	→	Possible values of the variable according to table M65: <table border="1" data-bbox="911 1084 1383 1671"> <thead> <tr> <th>Key</th> <th colspan="2">Decode</th> </tr> </thead> <tbody> <tr> <td>LT-FC</td> <td>LONG-TERM CURRENCY</td> <td>FOREIGN</td> </tr> <tr> <td>LT-LC</td> <td>LONG-TERM CURRENCY</td> <td>LOCAL</td> </tr> <tr> <td>ST-FC</td> <td>SHORT-TERM CURRENCY</td> <td>FOREIGN</td> </tr> <tr> <td>ST-LC</td> <td>SHORT-TERM CURRENCY</td> <td>LOCAL</td> </tr> </tbody> </table>	Key	Decode		LT-FC	LONG-TERM CURRENCY	FOREIGN	LT-LC	LONG-TERM CURRENCY	LOCAL	ST-FC	SHORT-TERM CURRENCY	FOREIGN	ST-LC	SHORT-TERM CURRENCY	LOCAL

Example for MV872:

MV872A	MV872B	MV872C	MV872D	MV872E	MV872F	MV872G	MV872H	MV872i	MV872J
LT-LC	A3	21.04.2020	AFFIRM			NEG	21.04.2020	EU Rated	CFR
LT-FC	A3	21.04.2020	AFFIRM			NEG	21.04.2020	EU Rated	CFR

By consolidating the individual rating types into one link/table per rating agency, the required number of fields is greatly reduced. Below is an overview of how the current representation can be mapped to the new one:

Variable ID	Variable name	Rating type		Old field	Old field description
MV872	MoodyRatIss	LT-LC	←	MDV466B - MDV466J	Moody's Local Currency Long Term Issuer Rating
		LT-FC	←	MDV467B - MDV467J	Moody's Foreign Currency Long Term Issuer Rating
		ST-LC	←	MDV468B - MDV468J	Moody's Local Currency Short Term Issuer Rating
		ST-FC	←	MDV469B - MDV469J	Moody's Foreign Currency Short Term Issuer Rating

Variable ID	Variable name	Rating type		Old field	Old field description
MV873	FitchRatIss	LT-D	←	MDV450A - MDV450D, MDV451Y, MDV451Z	Fitch Long Term Issuer/Default Rating
		LT-LCD	←	MDV450i - MDV450L, MDV451Y, MDV451Z	Fitch Long Term Local Currency Issuer/Default Rating
		ST-D	←	MDV450M - MDV450Q, MDV451Y, MDV451Z	Fitch Short Term Issuer/Default Rating
		ST-LCD	←	MDV450V- MDV450Y, MDV451Y, MDV451Z	Fitch Short Term Local Currency Issuer/Default Rating
MV874	S&PRatIss	LT-LC	←	MDV833A - MDV833F, MDV831H	Standard & Poor's Long-Term Local Currency Issuer Rating
		LT-FC	←	MDV832A - MDV832F, MDV830H	Standard & Poor's Long-Term Foreign Currency Issuer Rating
		ST-LC	←	MDV831A - MDV831F, MDV831H	Standard & Poor's Short-Term Local Currency Issuer Rating
		ST-FC	←	MDV830A - MDV830F, MDV830H	Standard & Poor's Short-Term Foreign Currency Issuer Rating

The result is the following mapping (incl. omission of the representation on the basis of the instruments):

MV872	Moody's		Old fields Moody's - indication of fields at issuer and instrument level respectively			
MV872A	RatingType	←	LT-LC	LT-FC	ST-LC	ST-FC

7. Depiction of instrument ratings

7.1. Information/Fields that are omitted in Segment G

Overview of the fields that are deactivated on the financial instrument:

Field	Field long description
GV462A-GV462L	Moody's Local Currency Corporate Family Issuer Rating
GV463A-GV463L	Moody's Foreign Currency Corporate Family Issuer Rating
GV464A-GV464L	Moody's Local Currency Financial Strength Issuer Rating
GV465A-GV465L	Moody's Foreign Currency Financial Strength Issuer Rating
GV466A-GV466L	Moody's Local Currency Long-Term Issuer Rating
GV467A-GV467L	Moody's Foreign Currency Long-Term Issuer Rating
GV468A-GV468L	Moody's Local Currency Short-Term Issuer Rating
GV469A-GV469L	Moody's Foreign Currency Short-Term Issuer Rating
GV474A-GV474L	Moody's Long-Term Foreign Currency Bank Deposit Issuer Rating
GV475A-GV475L	Moody's Short-Term Foreign Currency Bank Deposit Issuer Rating
GV476A-GV476L	Moody's Long-Term Local Currency Bank Deposit Issuer Rating
GV477A-GV477L	Moody's Short-Term Local Currency Bank Deposit Issuer Rating
GV478A-GV478K	Moody's Long-Term Rating und Short-Term Issuer Level Rating
GV479A- GV479M	Moody's Probability of Default Issuer Rating
GV415A-GV415P	Fitch Long-Term Issuer Ratings

Field	Field long description
GV416A-GV416L	Fitch Short-Term Issuer Ratings
GV417A-GV417T	Fitch Other Issuer Ratings
GD243i	Fitch Endorsement Compliance Issuer Rating
GD243J	Fitch Ratings Suffix Issuer Rating
GV830A-GV830F	Standard & Poor's Short-Term Foreign Currency Issuer Rating
GV831A-GV831F	Standard & Poor's Short-Term Local Currency Issuer Rating
GV832A-GV832F	Standard & Poor's Long-Term Foreign Currency Issuer Rating
GV833A-GV833F	Standard & Poor's Long-Term Local Currency Issuer Rating
GV834A-GV834F	Standard & Poor's Short-Term Local Currency Financial Strength Issuer Rating
GV835A-GV835F	Standard & Poor's Long-Term Local Currency Financial Strength Issuer Rating
GD244G	Standard & Poor's Foreign Currency Issuer Rating Regulatory Qualifier
GD244H	Standard & Poor's Foreign Currency Issuer Rating Endorsement Indicator
GD244i	Standard & Poor's Local Currency Issuer Rating Regulatory Qualifier
GD244J	Standard & Poor's Local Currency Issuer Rating Endorsement Indicator
GD244K	Standard & Poor's Financial Strength Issuer Rating Regulatory Qualifier
GD244L	Standard & Poor's Financial Strength Issuer Rating Endorsement Indicator

Within a linkage, linkage fields will be frozen at the instrument level, i.e. there will be no data adjustments in these linkage fields and therefore no data updates delivered. The last delivered value will remain applicable for these linkage subfields and will no longer be updated.

All rating data that will continue to be delivered in the known rating fields can be found in the comparison of the new field structure with the known representation in the chapter [Entirely new information/fields Segment G](#). Subfields that are not described there and/or in the following table, will be frozen

Overview of rating subfields that are frozen at the financial instrument and data updates that are no longer delivered:

Field	Field long description
GV456A	Moody's Rating ID for the Long-Term Instrument Rating
GV456K	Moody's Withdrawal Reason for the Long-Term Instrument Rating
GV457A	Moody's Rating ID Short-Term for the Short-Term Instrument Rating
GV457K	Moody's Withdrawal Reason Short-Term for the Short-Term Instrument Rating
GV458A	Moody's Rating ID for the Loss Given Default Instrument Rating
GV458K	Moody's Withdrawal Reason for the Loss Given Default Instrument Rating
GV418E-GV418H	Fitch Unenhanced Long-Term Instrument Rating
GV418i-GV418L	Fitch Long-Term National Instrument Rating
GV418M-GV418P	Fitch Long-Term Local Currency Instrument Rating
GV418Q	Fitch Issue Recovery Instrument Rating
GV418R	Fitch Issue Distressed Recovery Instrument Rating
GV418S-GV418V	Fitch Issue Market Sensitivity Instrument Rating
GV419E-GV419H	Fitch Unenhanced Short-Term Instrument Rating

Field	Field long description
GV419i-GV419L	Fitch Short-Term National Instrument Rating
GV419M-GV419P	Fitch Short-Term Local Currency Instrument Rating

The deactivation of the fields that will not be continued under EDDy_neu will be carried out at the end of the parallel phase.

7.2. Familiar depiction of the ratings in Segment G

It is possible to obtain some ratings at the financial instruments level via the known representation in Segment G or to use instead the new form indicated in the chapter [“Entirely new or additional information/fields in Segment G”](#). The following overview shows all variables that continue to exist. In this context, please refer to the previous chapter with regard to the rating subfields, which are no longer updated.

Variable ID	Variable Name	Further depiction =>
GV456 - incl. the corresponding linkage fields GV456A to GV456K	Moodys LT-Rt.G.	Replacement via the existing instrument ratings in Segment G or new depiction (see “Entirely new or additional information/fields” in Segment G).
GV457 - incl. the corresponding linkage fields GV457A to GV457K	Moodys ST-Rt.G.	Replacement via the existing instrument ratings in Segment G or new depiction (see “Entirely new or additional information/fields” in Segment G).
GV458 - incl. the corresponding linkage fields GV458A to GV458K	Moodys LGD-Rat.	Replacement via the existing instrument ratings in Segment G or new depiction (see “Entirely new or additional information/fields” in Segment G).
GV466 - incl. the corresponding linkage fields GV466A to GV466L	Moodys LC LT R.	Replacement via the existing issuer ratings in Segment M or new depiction (see “Entirely new or additional information/fields” in Segment M).
GV467 - incl. the corresponding linkage fields GV467A to GV467L	Moodys FC LT R.	Replacement via the existing issuer ratings in Segment M or new depiction (see “Entirely

Variable ID	Variable Name	Further depiction =>
		new or additional information/fields" in Segment M).
GV468 - incl. the corresponding linkage fields GV468A to GV468L	Moody's LC ST R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).
GV469 - incl. the corresponding linkage fields GV469A to GV469L	Moody's FC ST R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).

GV416 - incl. the corresponding linkage fields GV416A to GV416D, GV416i to GV416L, GD243i, GD243J	FIT EM ST Rat.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).
GV418 - incl. the corresponding linkage fields GV418A to GV418V, GD243C, GD243D	FIT GAT LT Rat.	Replacement via the existing instrument ratings in Segment G or new depiction (see "Entirely new or additional information/fields" in Segment G).
GV419 - incl. the corresponding linkage fields GV419A to GV419P, GD243C, GD243D	FIT GAT ST Rat.	Replacement via the existing instrument ratings in Segment G or new depiction (see "Entirely new or additional information/fields" in Segment G).
GV828 - incl. the corresponding linkage fields GV828A to GV828F, GD244A, GD244B	S+P ST Gatt.-R.	Replacement via the existing instrument ratings in Segment G or new depiction (see "Entirely new or additional information/fields" in Segment G).
GV829 - incl. the corresponding linkage fields GV829A to GV829F, GD244A, GD244B	S+P LT Gatt.-R.	Replacement via the existing instrument ratings in Segment G or new depiction (see

Variable ID	Variable Name	Further depiction =>
		"Entirely new or additional information/fields" in Segment G).
GV830 - incl. the corresponding linkage fields GV830A to GV830F, GD244H	S+P ST FC Em.-R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).
GV831 - incl. the corresponding linkage fields GV831A to GV831F, GD244J	S+P ST LC Em.-R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).
GV832 - incl. the corresponding linkage fields GV832A to GV832F, GD244H	S+P LT FC Em.-R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).
GV833 - incl. the corresponding linkage fields GV833A to GV833F, GD244J	S+P LT LC Em.-R.	Replacement via the existing issuer ratings in Segment M or new depiction (see "Entirely new or additional information/fields" in Segment M).

7.3. Entirely new information/fields in Segment G

In addition to the current representation of the instrument ratings, a representation without coding is added. This means that ratings are depicted 1:1 as they are delivered by the rating agencies. Consequently, there is no need to convert the WM coding into the actual rating format. The new representation is for the ratings of the agencies Moody's, Fitch and S&P and is shown as a table in individual components. There is a separate line entry for each individual rating type. This representation results in a maximum of 2 or 3 entries per ISIN and per rating module of the individual rating agency, depending on the rating agency.

Component	Variable ID	Variable name	Note
	GV492	Moody'sRatIns	

Component	Variable ID	Variable name		Note						
Moody's Instrument Rating	GV492A	RatingType	→	Possible values of the variable according to table M70: <table border="1" data-bbox="916 409 1310 696"> <tr> <td>LT</td> <td>LONG-TERM</td> </tr> <tr> <td>ST</td> <td>SHORT-TERM</td> </tr> <tr> <td>LGD</td> <td>LOSS GIVEN DEFAULT</td> </tr> </table>	LT	LONG-TERM	ST	SHORT-TERM	LGD	LOSS GIVEN DEFAULT
	LT	LONG-TERM								
	ST	SHORT-TERM								
	LGD	LOSS GIVEN DEFAULT								
	GV492B	Rating		Aaa, Baa1, etc.						
	GV492C	RatingDate								
	GV492D	Action								
	GV492E	Watch								
	GV492F	WatchDate								
	GV492G	Outlook								
GV492H	OutlookDate									
GV492i	Endorsement									
GV492J	Indicator									
Fitch Instrument Rating	GV493	FitchRatIns								
	GV493A	RatingType	→	Possible values of the variable according to table M71: <table border="1" data-bbox="916 1756 1193 1944"> <tr> <td>LT</td> <td>LONG-TERM</td> </tr> <tr> <td>ST</td> <td>SHORT-TERM</td> </tr> </table>	LT	LONG-TERM	ST	SHORT-TERM		
LT	LONG-TERM									
ST	SHORT-TERM									

Component	Variable ID	Variable name		Note				
	GV493B	Rating		AAA, BBB, etc.				
	GV493C	RatingDate						
	GV493D	Action						
	GV493E	Watch						
	GV493F	Outlook						
	GV493G	Endorsement						
	GV493H	Indicator						
S&P Instrument	Rating	GV494	S&PRatIns					
		GV494A	RatingType	→ Possible values of the variable according to table M72: <table border="1" data-bbox="916 1137 1193 1330"> <tr> <td>LT</td> <td>LONG-TERM</td> </tr> <tr> <td>ST</td> <td>SHORT-TERM</td> </tr> </table>	LT	LONG-TERM	ST	SHORT-TERM
LT	LONG-TERM							
ST	SHORT-TERM							
		GV494B	Rating	AAA, BBB, etc.				
		GV494C	RatingDate					
		GV494D	Watch					
		GV494E	WatchDate					
		GV494F	Outlook					
		GV494G	OutlookDate					
		GV494H	Endorsement					

Component	Variable ID	Variable name		Note
	GV494i	Indicator		

Example for GV492:

GV492 A	GV492 B	GV492C	GV492 D	GV492 E	GV492 F	GV492 G	GV492 H	GV492i	GV492 J
LT	Aaa	12.01.2017	NEW						EU Rated

By consolidating the individual rating types into one link/table per rating agency, the required number of fields is reduced. Below is an overview of how the current representation can be mapped to the new representation based on the rating types:

Variable ID	Variable Name	Rating types		Old field	Description old field
GV492	Moody'sRatIns	LT	←	GV456B - GV456J	Moody's Long-Term Rating
		ST	←	GV457B - GV457J	Moody's Short-Term Rating
		LGD	←	GV458B - GV458J	Moody's Loss Given Default Rating
GV493	FitchRatIns	LT	←	GV418A - GV418D, GD243C+GD243D	Fitch Long-Term Rating
		ST	←	GV419A - GV419D, GD243C+GD243D	Fitch Short-Term Rating

Variable ID	Variable Name	Rating types		Old field	Description old field
GV494	S&PRatIns	LT	←	GV829A - GV829F, GD244A+GD244B	Standard & Poor's Long-Term Rating
		ST	←	GV828A -GV828F, GD244A+GD244B	Standard & Poor's Short-Term Rating

The following overview shows the mapping in detail:

GV492	MoodysRatIns

8. Text fields in T format / Supplementary text fields

In the following, you find a detailed description of the future usage of text fields. There are currently texts in various field types in the WM database:

1. Texts behind fields in 'T' or 'V' format
2. Supplementary texts behind structured fields

Please see below for a detailed description.

8.1. Texts behind fields in 'T' or 'V' format

In the existing database, these texts fields serve to record longer continuous text or the textual representation of individual situations. There are no structured fields in the existing system for these continuous texts or they have proved to be too complex for the creation of such fields. These texts may be complete, which are mostly delivered by WM as part of a corporate action. These include offer texts, technical guidelines, information from insolvency notifications, custody account customer information, etc.

In addition, texts excerpts are saved that repeat or separately represent certain information from the offer texts, etc. Moreover, addresses for e.g. reference or redemption agents are currently saved in 'T' formatted fields.

Additional supplementary information is also saved in text form in the fields or information from several existing structured fields is depicted in summarised form.

The following fields in 'T' and 'V' format currently exist in the live database:

Segment	Field ID	Field name
B	BD993	MAIN ISSUING AGENTS
B	BD994	ISSUING AGENTS

The target for the representation under EDDy_neu is therefore to transfer as much as possible of the partially unstructured depicted information into new, structured variables. However, as this does not make sense or lead to the desired results in all cases, the adjustments can be divided into 3 groups:

8.2. Creation of new, structured variables

Either all or the most frequently occurring contents of the respective field are adopted and the old fields listed in the table below will no longer be provided in EDDy_neu by creating one or more new variables, partly by the creation of new, underlying tables or by the use of already existing tables. The following 'old fields' are affected:

Field ID Old	Variable ID New	Variable name New	Format	Length	Table

¹ In the context of future deliveries, a distinction is made between VF1 and VFX (EDDy_neu data feeds) with regard to some table variables. Accordingly, the table variable UV256 is for deliveries in VF1 format and UV221 for deliveries in VFX format.

² In the context of future deliveries, a distinction is made between VF1 and VFX (EDDy_neu data feeds) with regard to some table variables. Accordingly, the table variable KV089 is for deliveries in VF1 format and KV086 for deliveries in VFX format

³ In the context of future deliveries, a distinction is made between VF1 and VFX (EDDy_neu data feeds) with regard to some table variables. Accordingly, the table variable HV216 is for deliveries in VF1 format and HV215 for deliveries in VFX format.

⁴ In the context of future deliveries, a distinction is made between VF1 and VFX (EDDy_neu data feeds) with regard to some table variables. Accordingly, the table variable EV467 is for deliveries in VF1 format and EV466 for deliveries in VFX format.

*Information for convertible bonds that has so far been saved in GD982 have for the most part been depicted in a notification in segment U. The variable set UV253 supplements the notification by data on the periodicity of the conversion right. Consequently, all relevant information that was formerly available in GD982 is now available in the notification on the 'convertible right'. Therefore, GD982 will no longer be needed in the future. As all relevant information on the conversion right will be represented in the business transaction 'Conversion right' in the future, the populating of GV688 for conversion rights will no longer be necessary and therefore omitted.

Regarding the depiction of thresholds and repayments for warrants, certificates, reverse convertible bonds and bonds with a certificate-like structure, partly also depicted in GD982, a

separate variable set in the master data was already included in the database with the last Release. There will also be a separate Special Information issue in this regard. (Chapter 5)

The fields 'General Text' are a special cases (ED998, HD998, KD998, UD998, VD998).

Currently, various kinds of unstructured information is recorded in these fields.

For example, a new variable was created for the information until when an exchange alternative can be selected. This information was previously depicted in UD998:

Field ID Old	Variable ID New	Variable Name New	Format	Length	Table
UD998	UD087D	EXCHANGE ALTERNATIVE ELIGIBLE TILL	D	08	/

Furthermore, the entire (continuous) texts will be depicted as well. In the future, these long texts will be published via the WM Hub in PDF format and linked to the corresponding corporate action. The link always refers specifically to the respective measure and therefore only contains documents that can be directly assigned to the measure. This applies to matters that are SRD II relevant as well as other measures for which such texts are currently delivered. The maximum length of the URL will comprise 38 characters and will refer to the WM Hub. At the end of the link or after the slash, a 16-character UUID (Universally Unique Identifier) will be inserted, which references to the respective PDF. The following is an example (without function) of how such a link might look in the future:

<https://wm-srd-hub.eu/aslfh7weqr213hex>.

These documents will be accessible via the WM Hub without separate registration. Accordingly, it is not necessary for customers to register at the WM Hub to use this special service.

Field ID Old	Variable ID New	Variable Name New	Format	Length	Table
UD998	UD087E	LINK DOCUMENTS WM HUB	X	Old: 300 New: 38	/
KD998	KD131A	LINK DOCUMENTS WM HUB	X	Old: 300 New: 38	/

Field ID Old	Variable ID New	Variable Name New	Format	Length	Table
ED998	ED087D	LINK DOCUMENTS WM HUB	X	Old: 300 New: 38	/
HD998 HD998 (+ HD145)	HD142B	LINK DOCUMENTS WM HUB	X	Old: 300 New: 38	/

However, these two alternatives do not fully cover all the information that is currently recorded in the 998 fields.

Therefore, the four 'General text' fields mentioned above as well as GD998 (General text – Master data) and VD998 (General text) remain in EDDy_neu as it cannot be ruled out that for certain situations it might be necessary to provide additional information.

HD145 currently contains long continuous texts. These, just like the long continuous texts from HD998, will be retrievable in the future via the WM Hub via HD142B (link documents WM Hub). Field HD145 itself will not be part of EDDy_neu.

The following text reproduces the content of the previously published document D40 from the EIC:

As a result of the pre-production phase and our intensive discussions with customers, WM Datenservice has decided to add an extension to "Text fields in T format/Supplementary text fields". It is a purely optional representation.

In addition to the structured variables and the PDF documents that can be retrieved via URL, WM Datenservice will also provide a summary of the information contained in the documents via variables. The summarized information will be displayed in the following fields:

Field-ID	Variable ID	Name	Component	Length	Format
ED650	SupplementalInfo	Supplemental information	Text income	3950 characters	T
HD650	SupplementalInfo	Supplemental information	Text general meetings	3950 characters	T
KD650	SupplementalInfo	Supplemental information	Text corporate actions	3950 characters	T

UD650	SupplementalInfo	Supplemental information	Text conversions/exchanges	3950 characters	T
--------------	------------------	--------------------------	----------------------------	-----------------	---

The variables will be made available with the Major Release in June 2022 for EDDy_neu and filled accordingly for test purposes during the customer test phase.

8.3. Deleted old fields

In addition to the fields described in item 8.2 that have been restructured into variables, a large number of old fields are no longer required. Either there are already structured counterparts for these fields or they are currently not or will no longer be used. This is due, among other things, to changing market requirements or changes in the WM database, which make some fields obsolete.

Consequently, neither of the following fields with T or V format will be available in EDDy_neu:

Field ID Old	Reason
BD993	Is no longer required in the segment for EDDy_neu– Redundancy GV995
BD994	Is no longer required in the segment for EDDy_neu
BD998	Is no longer required in the segment for EDDy_neu
UD993	Obsolete – redundancy to contents of GV995
KD993	Obsolete – redundancy to contents of GV995
KD120D	Obsolete – redundancy to the old field KD994 and/or the new table variable KV086
KD120E	
KD120G	
KD120H	
KD120I	
HD192	Documents will be available in the WM Hub in the future. Together with the long continuous texts previously stored in HD998, this field will therefore merge into the new variable HD142B.
ED993	Obsolete – redundancy to contents of GV995
VD996	No longer used – the last time the field was populated in 2015
VD993	Obsolete – redundancy to contents of GV995

Field ID Old	Reason
VD994	Obsolete – redundancy to contents of GV995
VD031A	Not used – has never been populated
VD032A	Not used – has never been populated
GD988	Not used
GD996	Not used
GD997	No longer needed – information on e.g. name changes, mergers, change of debtor already depicted in other fields (e.g. GD250)
MTSUWO	No longer required
ZD103F	Part of the product 'AT funds tax data' – No more deliveries - product & and thus the field will be ceased

8.4. Text fields that remain

There are also variables in EDDy_neu which have a textual content. "Textual content" in this case does not necessarily mean a longer running text, but rather the unstructured presentation of the content in textual form. Accordingly, it may also be a shorter string of characters. This includes variables whose content is generated hard-coded (i.e. composed of other, already existing information) or is already delivered to WM in the required form on the source side (these can thus be written directly into the fields concerned in the form of a text block).

There are also a few fields in T format which will remain because of their complexity due to technical or content related field population.

Field ID Old	Field name Old
UD116	CLEARSTREAM/DEPOSITORY SETTLEMENT
KD116	CLEARSTREAM/DEPOSITORY SETTLEMENT

ED998*	GENERAL TEXT
GD998*	GENERAL TEXT – MASTER DATA
HD998*	GENERAL TEXT
KD998*	GENERAL TEXT
UD998*	GENERAL TEXT
VD998*	GENERAL TEXT

*as already described in item 8.2, the 998s fields will remain in EDDy_neu and will continue to be used to record information in textual form (excluding the aforementioned long continuous texts). Provided that no structured variables are available for the corresponding information. However, the aim is to present as little information as possible in unstructured form in the future.

8.5. Supplementary texts behind structured fields

In addition to the textual information in fields with T or V format information, information is provided and delivered textually in many cases as a supplement to actually structured fields, which explain the structured value in more detail to transport additional information about the topic of the field. Furthermore, values are provided there if the format of the field itself does not provide sufficient space. Due to technical reasons, additional information on a field can no longer be saved in EDDY_neu in the previously used manner, for which the respective variables

are not intended. For example, in the future, information on consent or premium payments can no longer be saved in and/or on UD008A.

This means that the previous 'additional information' will be depicted in a structured way with the help of new variables in the future or can be omitted.

The decisive factor for the inclusion of the information as new variable(s) was that it represents an enrichment and that it continues to be frequently recurring statements. This enrichment is, for example, a more in-depth explanation of a measure and/or subject or the deepening of a topic through supplementary variables to an existing set of topics and/or variables.

Furthermore, those variables for which the field length was not (or no longer) sufficient and which were therefore set up again with identical content but with a larger character set.

Please note that the 'old fields' described in the second column from the right do NOT necessarily cease to exist. Mentioning the fields only serves to locate where the relevant information could be found previously. The new variables will contain the relevant information in the future.

Please see Chapter 18 regarding the question whether an 'Old field' described in the second column from the right is ceased or not,

Variable ID New	Variable name New	Form at	Leng th	Tab le	Textually provision so far	Description/Cont ent of the variables
UD007B	ACCEPTANCE WITH ALLOCATION CODE POSSIBLE	X	1	G83	UD008A	The acceptance of an offer when submitted with an allocation code may result in holders being given preferential treatment, e.g. in the case of an allotment on takeover, etc.
UD008C	EARLY/LATE 1	X	2	UA3	UD008A	Represents whether a delivered transaction is an early or late tender/exchange.
UD008D	EARLY/LATE 2	X	2	UA4	UD008A	Supplement to UD008C, in which form a possible early/late premium

Variable ID New	Variable name New	Format	Length	Table	Textually provision so far	Description/Content of the variables
						or whether an early/late consent fee is paid.
UD008E	MULTIPLE OPTIONS	X	2	UA5	UD008A	Possibility to tag the individual options for Multiple Option Offer.
UD008F	SUB TYPE OFFER	X	2	UA6	UD008A / UD010D	Supplementary information on the event type. The variable contains keys to the different types of conversions/repurchases, etc.
UD008G	CONSENT INFORMATION 1	X	2	UA7	UD008A	Represents if a delivered transaction is accompanied by a 'Consent Solicitation' and if applicable. A 'Consent Fee'.
UD008H	CONSENT INFORMATION 2	X	2	UA8	UD008A	Supplements UD008G to specify whether participation in the offer is conditional on consent or not.
UD008I	CONSENT INFORMATION 3 – PAYMENT IN	X	1	UC3	UD008A	Supplements UD008G, in which form a Consent Fee is paid.
UD013A	PRORATION FACTOR IN PERCENT	N	Old: 10.9 New: 3.9	/	UD014B / UD011D	This is the factor that is applied to the payout in cash or units.
UD014H	APPLICATION OF POOL FACTOR	X	1	G83	UD014B / UD011D	The application of the pool factor can influence the actual payment/entry to the holders by the corresponding value.

Variable ID New	Variable name New	Form at	Leng th	Tab le	Textually provision so far	Description/Cont ent of the variables
UD014I	AMOUNT/PAYMENT/TEXT	X	100	/	UD014B	To depict certain situations that directly influence the payment.
UD018A	EXPECTED PAYMENT DATE	X	1	G83	UD018	Serves to tag a payable data as expected. As long as there is no clear payable date, e.g. no accrued interest will be delivered as its calculations is based on the date.
UD030A	OTHER PARTICIPATION RESERVATIONS	T	3,900	/	UD030	To save payment-related information or restrictions that cannot be represented by the existing structured fields.
UD030B	CURRENCY/UNIT/TOKEN MINIMUM ACCEPTANCE AMOUNT	X	3	W01	UD030	To indicate the smallest amount of capital or securities which must participate in an offer or be accepted by the issuer in order for the offer to be made.
UD030C	MINIMUM ACCEPTANCE AMOUNT	N	Old: 15.4 New: 15.3	/	UD030	
UD030D	MINIMUM ACCEPTANCE AMOUNT IN PERCENT	X	1	W03	UD030

9. Segment P –stopped securities

Physical securities have become less and less important in recent years because the vast majority of financial instruments are securitised as global certificates. Among other things, this is due to the predominantly electronic securities trading, in which actual deliveries no longer take place. In consequence, the relevance of the so-called list of stopped securities has been reduced continuously, because within the scope of digital securities transactions a security can neither be stolen, lost nor otherwise gone. Moreover, this trend is further enhanced by the emergence of additional types of custody in the form of block chains. In this context, we also would like to mention the discontinuation of effective fund units through the UCITS V Implementation Act. Since 2017, all physical securitisations of German funds have lost their securities character.

In total, there are 13,023 ISINs on the current list of stopped securities, of which only 865 ISINs are marked as active.

Changes (new ISINs, deletions etc.) in the list of stopped securities over the last five years as follows:

- in 2016: 58 ISINs
- in 2017: 56 ISINs
- in 2018: 40 ISINs
- in 2019: 33 ISINs
- in 2020: 19 ISINs

So also this trend confirms that the list of stopped securities is becoming less and less important. We rather expect the list of stopped securities to remain mainly static, with only minor to no changes in the upcoming years.

Due to the above-described reasons, the list of stopped securities is to be removed from the data streams for the introduction of EDDy_neu and will be provided online as PDF (note: already today published there). In the case that there are any unexpected changes to that data, we will depict it in the PDF accordingly.

10. Reconciliation of the information provided by the depositories

10.1. Background

Currently, discrepancies of payment-relevant information between WM and four depositories are published as textual additions to the affected fields; only summary statements about the synchronicity or discrepancy of an event are made in formatted fields.

Under EDDy_neu, the discrepancies are provided formatted in own components within separate table sub-variables making a summary statement on synchronicity obsolete.

10.2. New table variables

10.2.1. Income

Deviating information of our depositories on income are assigned to the component "Depository deviations income" and are publicized via our new table EV604:

Variable ID	Variable Name	Format	Length	Table
EV604	DEPOSITORY DISCREPANCIES INCOME	U	00	Div.
EV604A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
EV604B	DEPOSITORY	X	02	E29
EV604C	EX DATE	D	08	/
EV604D	PAYMENT DATE	D	08	/
EV604E	GROSS INCOME	Old: N New: S	9,9	/
EV604F	CURRENCY BDB	X	03	W01
EV604G	RECORD DATE	D	08	/
EV604H	FULL WITHHOLDING TAX	N	6,7	/
EV604I	PAYMENT PERIOD FROM	D	08	/
EV604J	PAYMENT PERIOD TO	D	08	/
EV604K	COUPON TERM IN DAYS	N	04	/
EV604L	POOL FACTOR	N	1,9	/
EV604M	CANCELLATION ID	X	01	GG2

10.2.2. Redemptions

"Depository discrepancies redemptions" is the component for repayments and VV132 is the corresponding table:

Variable ID	Variable Name	Format	Length	Table
VV132	DEPOSITORY DISCREPANCIES REDEMPTIONS	U	00	Div.
VV132A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
VV132B	DEPOSITORY NAME	X	02	E29
VV132C	REDEMPTION TYPE	N	02	V01
VV132D	REDEMPTION DATE	D	08	/
VV132E	REDEMPTION AMOUNT	N	9,9	/
VV132F	PAYMENT DATE	D	08	/
VV132G	RECORD DATE	D	08	/
VV132H	CURRENCY BDB	X	03	W01
VV132I	POOL FACTOR AFTER REDEMPTION	N	9,9	/
VV132J	NOMINAL VALUE AFTER REDEMPTION	N	9,9	/
VV132K	WKN AFTER REDEMPTION	X	06	/
VV132L	ISIN AFTER REDEMPTION	X	12	/
VV132M	NUMERATOR	N	Old: 10,9 New: 9.9	/

Variable ID	Variable Name	Format	Length	Table
VV132N	DENOMINATOR	N	Old: 10,9 New: 9.9	/
VV132O	CANCELLATION ID	X	01	GG2

10.2.3. Corporate actions

The Component for corporate actions is called "Depository discrepancies KAP".KV126 is the corresponding table for variables that cannot occur more than once per business transaction:

Variable ID	Variable Name	Format	Length	Table
KV126	DEPOSITORY DISCREPANCIES KAP	U	00	Div.
KV126A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
KV126B	DEPOSITORY	X	02	E29
KV126C	EVENT TYPE	Old: X New: N	02	K01
KV126D	SUBSCRIPTION PERIOD FROM	D	08	/
KV126E	SUBSCRIPTION PERIOD TO	D	08	/
KV126F	SUBSCRIPTION RIGHT NOTICE FROM	D	08	/
KV126G	SUBSCRIPTION RIGHT NOTICE TO	D	08	/
KV126H	CURRENCY/ UNIT/ TOKEN BDB	X	03	W01

Variable ID	Variable Name	Format	Length	Table
KV126I	SUBSCRIPTION PRICE	N	6,7	/
KV126J	EX DATE	D	08	/
KV126K	DETACHMENT DATE	D	08	/
KV126L	RECORD DATE	D	08	/
KV126M	PAYMENT DATE	D	08	/
KV126N	EFFECTIVE DATE	D	08	/
KV126O	ENTRY DATE ON	D	08	/
KV126P	CANCELLATION ID	X	01	GG2

Some variables for capital changes (and conversions) can have more than one specification per business transaction. In order to be able to publish these details in a formatted form, separate tables are introduced.

Table KV128 (component as above) lists multiple subscription ratios or subscriptions:

Variable ID	Variable Name	Format	Length	Table
KV128	DEPOSITORY DISCREPANCIES KAP SUBSCRIPTION RATIO	U	00	Div.
KV128A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
KV128B	DEPOSITORY	X	02	E29
KV128C	CURRENCY/ UNIT/ TOKEN NUMERATOR SUBSCRIPTION RATIO	X	03	W01

Variable ID	Variable Name	Format	Length	Table
KV128D	NUMERATOR SUBSCRIPTION RATIO GERMAN	N	Old: 15,12 New: 9,9	/
KV128E	CURRENCY/ UNIT/ TOKEN DENOMINATOR SUBSCRIPTION RATIO	X	03	W01
KV128F	DENOMINATOR SUBSCRIPTION RATIO GERMAN	N	Old: 15,12 New: 9,9	/
KV128G	SUBSCRIBED SECURITY WKN	X	06	/
KV128H	SUBSCRIBED SECURITY ISIN	X	12	/
KV128I	CANCELLATION ID	X	01	GG2

Table KV130 lists (multiple) detachment ratios:

Variable ID	Variable Name	Format	Length	Table
KV130	DEPOSITORY DISCREPANCIES KAP DETACHMENT RATIO	U	00	Div.
KV130A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
KV130B	DEPOSITORY	X	02	E29
KV130C	CURRENCY/ UNIT/ TOKEN NUMERATOR DETACHMENT RATIO	X	03	W01
KV130D	NUMERATOR DETACHMENT RATIO GERMAN	N	Old: 15,12 New: 9,9	/

Variable ID	Variable Name	Format	Length	Table
KV130E	CURRENCY/ UNIT/ TOKEN DENOMINATOR DETACHMENT RATIO	X	03	W01
KV130F	DENOMINATOR DETACHMENT RATIO GERMAN	N	Old: 15,12 New: 9,9	/
KV130G	SUBSCRIPTION RIGHTS WKN	X	06	/
KV130H	SUBSCRIPTION RIGHTS ISIN	X	12	/
KV130I	CANCELLATION ID	X	01	GG2

10.2.4. Conversions/exchanges

Singular fields for conversions are contained in the component "depository deviations" UMT and/or in table UV246:

Variable ID	Variable Name	Format	Length	Table
UV246	DEPOSITORY DISCREPANCIES CONVERSIONS/ EXCHANGES	U	00	Div.
UV246A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
UV246B	DEPOSITORY	X	02	E29
UV246C	EVENT TYPE	X	02	U20
UV246D	OFFER PERIOD FROM	D	08	/
UV246E	OFFER PERIOD TO	D	08	/
UV246F	CURRENCY/UNIT/TOKEN AMOUNT PAYMENT/ ADDITIONAL CHARGE	X	03	W01

Variable ID	Variable Name	Format	Length	Table
UV246G	AMOUNT PAYMENT	N	Old: 10,9 New: 10.8	/
UV246H	ADDITIONAL CHARGE	N	Old: 10,9 New: 10.8	/
UV246I	CURRENCY/UNIT/TOKEN CONVERSION PRICE	X	03	W01
UV246J	CONVERSION PRICE	N	9,9	/
UV246K	PAYMENT DATE	D	08	/
UV246L	DETACHMENT DATE	D	08	/
UV246M	EX DATE	D	08	/
UV246N	RECORD DATE	D	08	/
UV246O	LIQUIDATION ON	D	08	/
UV246P	EFFECTIVE DATE	D	08	/
UV246Q	ENTRY DATE ON	D	08	/
UV246R	CANCELLATION ID	X	01	GG2

The multiple occurrence of variables in the same business transaction is expressed in the following three tables:

Depository discrepancies conversion/exchange ratios

Variable ID	Variable Name	Format	Length	Table
UV248	DEPOSITORY DISCREPANCIES CONVERSIONS / EXCHANGES - RATIO	U	00	Div.
UV248A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
UV248B	DEPOSITORY	X	02	E29
UV248C	RATIO NUMERATOR GERMAN	N	Old: 15,12 New: 9,9	/
UV248D	CURRENCY/ UNIT/ TOKEN RATIO NUMERATOR	X	3	W01
UV248E	RATIO DENOMINATOR GERMAN	N	Old: 15,12 New: 9,9	/
UV248F	CURRENCY/ UNIT/ TOKEN RATIO DENOMINATOR	X	03	W01
UV248G	WKN NEW SECURITY	X	06	/
UV248H	ISIN NEW SECURITY	X	12	/
UV248I	CURRENCY/UNIT/TOKEN PAYMENT AMOUNT	X	03	W01
UV248J	PAYMENT AMOUNT	N	Old: 10,9 New: 10.8	/
UV248K	CANCELLATION ID	X	1	GG2

Depository discrepancies consent payments:

Variable ID	Variable Name	Format	Length	Table
UV250	DEPOSITORY DISCREPANCIES CONVERSIONS/EXCHANGES - CONSENT	U	00	Div.
UV250A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
UV250B	DEPOSITORY	X	02	E29
UV250C	CURRENCY/ UNIT/ TOKEN CONSENT FEE	X	3	W01
UV250D	CONSENT FEE	N	6,7	/
UV250E	CANCELLATION ID	X	1	New: GG2 Old: /

Depository discrepancies premium payments:

Variable ID	Variable Name	Format	Length	Table
UV252	DEPOSITORY DISCREPANCIES CONVERSIONS / EXCHANGES - PREMIUM	U	00	Div.
UV252A	SEQUENTIAL NUMBER	N	Old: 02 New: 04	/
UV252B	DEPOSITORY	X	02	E29
UV252C	CURRENCY/ UNIT/ TOKEN PREMIUM	X	3	W01
UV252D	PREMIUM AMOUNT	N	6,7	/
UV252E	CANCELLATION ID	X	1	GG2

Table E29 lists the various depository institutions, with Clearstream Banking Frankfurt now being managed separately from Clearstream Banking Luxembourg:

Key	Decode
01	Depository 1
02	Depository 2
03	Depository 3
04	CBF
05	CBL

10.2.5. Omitted fields

As the depository information, which deviates from the WM data, is provided formatted in tabular form, the currently provided summary statement as to whether a WM event is synchronous with the depositories or not, becomes superfluous, which is why the following fields are omitted:

KeyField ID	Field Name
ED002, KD002, UD002, VD002	QUALITY STATUS
ED003A, KD003A, UD003A, VD003A,	CONFIRMATION DEPOSITORY 1
ED003B, KD003B, UD003B, VD003B	CONFIRMATION DEPOSITORY 2
ED003C, KD003C, UD003C, VD003C	CONFIRMATION DEPOSITORY 3
ED003, KD003, UD003, VD003	TOTAL NUMBER OF CONFIRMATIONS

In addition, field ED311 (interest rate CBF p.r.t.), is cancelled as it might be redundant to EV604E as well as sub field GV733C.

11. WKN/ISIN Change

11.1. Introduction

Each financial instrument is uniquely identifiable by its ISIN and WKN. Both identifiers have a 1:1 relationship to each other. The change of the ISIN (WKN) results in a change of the WKN (ISIN). Exceptions are an incorrect allocation of WKNs and ISINs or if the ISIN is used more than once by a National Numbering Agency or if the National Numbering Agency changes the ISIN due to a different interpretation of the ANNA guidelines.

11.2. Functional procedure

11.2.1. Delivery identifier 8

With the delivery indicator 8, the cancellation notice of the old ISIN/WKN combination is marked as invalid.

11.2.2. List of securities

In order to be able to obtain master data, the customer must write the required ISINs on a list of securities. With regard to the ISIN/WKN change, WM will not introduce an automatism to write the new ISIN/WKN combination on the list of securities automatically.

11.2.3. Data delivery

WM will provide a QW-ISIN in the exchange/conversion data (UV302). WM will not deliver data records for this QW-ISIN.

11.3. Omission of change procedures

The following reasons for a change of ISIN, are not connected with a change of the financial instrument. These change procedures are deleted because there has been no application them in the past.

UD008A	Reason	Description
CO	ISIN change	Name change
CP	ISIN change	Certificate exchange
CQ	ISIN change	Coupon renewal through certificate exchange

UD008A	Reason	Description
CR	ISIN change	Conversion to no-par shares
CS	ISIN change	Scheme of arrangement
CT	ISIN change	Conversion to book-entry securities

11.4. Change procedures

The following reasons for a change of ISIN, are not connected with a change of the financial instrument and are identified by the change reasons in variable UD008A

ISIN change without change of the financial instrument

UD008A	Reason	Description	Status of the old ISIN/WKN combination	Status of the new ISIN/WKN combination
CF	ISIN change	The interim ISIN (XC-ISIN) will be replaced by an official ISIN.	29 Cancellation	02 New WKN due to conversion or exchange
CG	ISIN change	The previously valid ISIN was withdrawn and replaced by the responsible NNA.	29 Cancellation	02 New WKN due to conversion or exchange
CH	ISIN change	Due to change of name (without exchange of securities)	29 Cancellation	02 New WKN due to conversion or exchange
CI	ISIN change	Due to the relocation of the headquarters (without exchange of securities)	29 Cancellation	02 New WKN due to conversion or exchange
CJ	ISIN change	Due to consolidation of share tranches (without exchange of securities)	29 Cancellation	02 New WKN due to conversion or exchange
CK	ISIN change	The global certificate is held in custody in another country (without exchange of securities)	29 Cancellation	02 New WKN due to conversion or exchange
CL	ISIN change	The revocation of the ISIN was carried out erroneously and will be changed.	29 Cancellation	02 New WKN due to conversion or exchange, 08 Reactivation

ISIN change

Note: The old QW-ISINs will no longer be assigned to the old WKNs in the case of the following ISIN changes: This means that the assignment of a QW-ISIN will be omitted for "deleted" WKNs. The instrument data record will be identified in GD100 with the field value 29 (Cancelled) and delivered with the delivery indicator 8.

UD008A	Reason	Description	Status of the old ISIN/WKN combination	Status of the new ISIN/WKN combination
CU	Reactivation	Reactivation of the ISIN	29 Cancellation	65 Reactivation
CV	WKN/ISIN change	Correction of an ISIN incorrectly allocated to the WKN (WKN remains unchanged)	29 Cancellation	05 New WKN due to admission
CW	WKN/ISIN change	Correction of an ISIN incorrectly allocated to the WKN (WKN remains unchanged)	29 Cancellation	05 New WKN due to admission
CX	WKN/ISIN change	ISIN 1 allocated to WKN 1 must be replaced by ISIN 2 allocated to WKN 2.	29 Cancellation	05 New WKN due to admission

11.5. Variables

This section lists all variables that are relevant for the business operation ISIN change.

11.5.1. Important Variables for the business operation ISIN change.

Field	Field description	Variable
UD008A	Exchange reason	Reason for conversion
UV217L	WKN post exchange	WKN of the underlying
UV217M	ISIN post exchange	ISIN of the underlying
UD025	Ex date	Ex date
Old: GV302 New: UV302	MASTER DATA ISIN CHANGE	

11.5.2. Important variables for the business operation master data.

Fields	Field description	Variable
GD090	Effective date	Effective date
GD100	Status	Reason for securities status
GV103	ISIN/WKN until	ISIN/WKN valid until
GD153	ISIN post change	ISIN post ISIN/WKN change
GD153A	ISIN post change (reason)	ISIN post change (reason)
GD154	WKN post change	WKN post ISIN/WKN change
GD622	ISIN	ISIN
GD622PW	WKN	WKN valid for cross-border securities transactions

In the future, the exchange reason from UD008A will be made available in addition to the master data of the old ISIN/WKN combination in field GD153A.

11.5.3. Variables Relevant for the business operation ISIN Change

Field	New variables	Field description	Component system_name	Variable system_name
UD001		Exchange status	ExchStatusInfo	ExchangeStatus
UD002		Quality status	ExchStatusInfo	QualityStatus

Note:

Partially, known GD fields will be replaced by new variables or newly added. In addition, there is a differentiation in the delivery formats, see chapter 8.5.

The newly created UV fields (UV302) provide an overview of the master data of the new ISIN/WKN combination.

Some fields will be replaced. You find the new variables in the column "New variables."

Example: UD021PI will be replaced in UV217M. UD021 will be replaced in UV217L.

Field	Name	Description
UV302	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE)	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE)</p> <p>These corresponding linkage fields provide an overview of the new ISIN/WKN combination</p>

Field	Name	Description
UV302A	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) REASON FOR THE STATUS	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) REASON FOR THE STATUS</p> <p>This field contains the reason for the status of the security. The value of GD100 of the new ISIN/WKN combination is provided in this linkage field. Table G54 of field GD100</p>
UV302B	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SECURITY LONG DESCRIPTION 1	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SECURITY LONG DESCRIPTION 1</p> <p>This field contains in 30 characters the 2nd half of the 60 character long description of the security. The long description (1) contains the issuer name of the security. The value of GD270A of the new ISIN/WKN combination is provided in this linkage field.</p>
UV302C	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SECURITY LONG DESCRIPTION 2	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SECURITY LONG DESCRIPTION 2</p> <p>This field contains in 30 characters the 2nd half of the 60 character long description of the security. The long description (2) contains the instrument description, in the case of fixed-interest securities without interest rate and without interest date, but with issue and final maturity year as well as start of redemption or debtor call option. The value from GD270B of the new ISIN/WKN combination is provided in this linkage field.</p>

The value of GD483 of the new ISIN/WKN combination is provided in this linkage field.</p>

Field	Name	Description
UV302E	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SETTLEMENT CURRENCY ISO 4217	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) SETTLEMENT CURRENCY ISO 4217</p> <p>This field contains the currency in which OTC trades are usually settled. The settlement currency corresponds to the currency in field GD170 CUSTODY AND SETTLEMENT CURRENCY/UNIT/TOKEN. This does not apply to funds whose unit classes in GD172 may have a settlement currency that differs from the base currency of the fund in GD170. The value of GD172 of the new ISIN/WKN combination is provided in this linkage field. Table W2 of GD172.</p>
UV302F	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) PRODUCT SEGMENTATION	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) PRODUCT SEGMENTATION</p> <p>This field contains the instrument type for the product and instrument segmentation. The value of GD198B of the new ISIN/WKN combination is provided in this linkage field. Table GE9 of field GD198B.</p>
UV302G	MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) INSTRUMENT TYPE	<p>MASTER DATA NEW ISIN/WKN COMBINATION (ISIN CHANGE) INSTRUMENT TYPE</p> <p>This field contains the instrument type for the product and instrument segmentation. The value of GD198C of the new ISIN/WKN combination is provided in this linkage field. Table GF1 of field GD198C.</p>
UV302H	QW-ISIN (ISIN/WKN change)	<p>QW-ISINs are issued in the context of the ISIN-WKN change. The QW-ISIN is provided for the internal record keeping of the financial institutions. WM will not deliver a data record for these QW-ISINs.</p>
UV302I	DE ticker symbol	<p>This field contains the ticker symbol for financial instruments listed on German stock exchanges</p>

11.6. Description of the master data set

11.6.1. Cancellation of the old ISIN/WKN master data record

The old ISIN/WKN combination is assigned the field value "29 Cancellation" in GD100. The field values 81 (inactive due to ISIN change) or 84 (deletion WKN/ISIN) are no longer used in connection with these change operations. The new ISIN/WKN combination is referenced in variables GD153 and GD154. The cancelled master data record of the old ISIN/WKN combination is delivered in its entirety and is assigned delivery indicator 8. In addition to the master data records of the old ISIN-/WKN combination, the following segments are also delivered with delivery identifier 8:

- G – Master data
- E – Income data
- K – Corporate actions
- V - Drawing
- H – General meetings
- U – Conversion/exchanges
- R – Computation fields
- X – Stocks/futures/exchanges and trading practicing (OHC data)

11.6.2. Provision of the new ISIN/WKN master data record "ISIN change without change of financial instrument"

The new ISIN/WKN combination is provided with field values 02 in status GD100. In the new ISIN/WKN combination, the old ISIN/WKN combination is referenced in variable GV103.

11.6.3. Provision of the new ISIN/WKN master data record "ISIN reactivation"

The new ISIN/WKN combination is provided with field value 65 in status GD100. In the new ISIN/WKN combination, the old ISIN/WKN combination is referenced in variable GV103

11.6.4. Provision of the new ISIN/WKN master data record "ISIN change variation"

The new ISIN/WKN combination is provided with field value 05 in status GD100. In the new ISIN/WKN combination, reference is made to the old ISIN/WKN combination in variable GV103.

11.7. Provision of lifecycle data

11.7.1. Corporate Actions

For ISIN/WKN changes without a change of the financial instrument, corporate action data already delivered under the old ISIN/WKN combination are transferred to the new ISIN/WKN combination, provided that an ex-date of the corporate action is after the ex-date of the ISIN/WKN change and/or its "period from..." is less than 180 calendar days from the EX-ISIN/WKN change is not completed. A corporate action is not completed if the field value 01 – Announced is depicted in UD001.

This procedure is especially intended for the change operations CF, CG, CH, CI, CJ, CK, CL

The following examples illustrate the procedure. It must be taken into account that a fictitious ex-date of the ISIN-WKN change is today.

Example 1:

Example Income Data A0M67R – JP3831550003		
ED006	DIVIDEND TYPE	10 Regular dividend
ED007	Ex date	29.12.2021

As the ex-date is in the future, the record data is transferred to the new ISIN-/WKN combination.

Example 2:

Example Merger 898536 - US8119041015		
UD008A	Exchange reason	01 Tender offer
UD025	Ex date	16.04.2021

As the ex-date is in the past, the record data is not transferred to the new ISIN-/WKN combination.

Example 3:

Example Reverse Split A1CTHX - AU000000SBU1		
UD008A	Exchange reason	AA Reverse split
UD025	Ex-date	12.07.2021

As the ex-date is in the past, the record data is not transferred to the new ISIN-/WKN combination.

Example 4:

Example Tender Offer A1CTHX - AU000000SBU1		
UD008A	Exchange reason	01 Tender offer
UD016A	Offer Period from	26.04.2021

The procedure is not completed. The data record is therefore transferred to the new ISIN-/WKN combination.

Note:

Cancellation of the corresponding messages in the old ISIN/WKN combination are provided with the field value T (cancellation due to ISIN change) in the variables ED001, BD001, KD001, HD001, UD001, VD001. This includes especially the changes CF, CG, CH, CI, CJ, CK, CL.

11.7.2. Special cases ISIN/WKN changes CV, CW, CX

Corrections or additions of data are described by means of a matrix and are named in item 10.9 under the old ISIN/WKN combination.

11.7.3. Stock market data

In all data records that show an exchange trade, the delisting is delivered under the old ISIN/WKN combination with the reason "Delisting due to ISIN_change" (XD030 = W).

11.8. Correction of an incorrect ISIN/WKN change

The old and erroneously cancelled ISIN/WKN combination is activated with field value "08 Reactivation" in status GD100. The erroneously new ISIN/WKN combination is changed back by using CL as ISIN change reason (ISIN change without change of the financial instrument). See delivery example ISIN change without change of the financial instrument.

Note:

Under these circumstances it may occur that for the activated ISIN/WKN combination (GD100 = 08) a new cancellation of the instrument with the delivery indicator 8 will be necessary. Such a situation can arise if the ISIN/WKN combination is actually no longer valid at a certain point in time.

In addition, the ISIN/WKN combination activated by mistake is marked with the delivery indicator 8 and GD100 = 29.

11.9. Matrix for the data provision with example:

Example/ initial situation: A financial instrument was so far listed under WKN 111111 and ISIN DE0001111117.

With the ex-date 15.04.2022 an ISIN-/WKN change will take place. As an example, the change reason CV (exchange due to correction of an ISIN incorrectly assigned to the WKN (WKN remains unchanged) is given.

Under the previous ISIN-/WKN combination, there is already corporate actions data available (e.g. income report and conversion report). The ex-date of this corporate actions data is in the past and therefore before the ex-date of the ISIN-WKN change. In addition, there are fund prices, JV data and OHC data under the previous ISIN/WKN combination.

	G - Master data record	E - Income data (event data)	U - Conversions and exchanges (event data)	I - Fund prices (price data)	J - MiFID key figures (price data)	R - Computation fields (e.g. RD003 or RV001)	X - Stock/futures exchanges and trading practices (OHC)
	WKN: 111111 ISIN: DE0001111117	WKN: 111111 ISIN: DE0001111117 BID: 123456789012 / ex-date: 13.03.2022 / ED001 = 3 (valid - approved)	WKN: 111111 ISIN: DE0001111117 BID: 987654321012 / ex-date: 28.12.2021 / UD001 = "2"	WKN: 111111 ISIN: DE0001111117 ID901 since 01.01.2021	WKN: 111111 ISIN: DE0001111117 JV001 since 01.02.2021	WKN: 111111 ISIN: DE0001111117	WKN: 111111 ISIN: DE0001111117 BID: A12345678901
CV change procedure	ISIN /WKN change: reason for CV (conversion/exchange due to an ISIN wrongly allocated to a WKN (the WKN remains unchanged)). New ISIN: DE0002222228 Ex date: 15.04.2022 New combination: WKN 111111 und ISIN DE0002222228 Old combination: WKN 111111 und ISIN DE0001111117						
Feature	./.	The event data ex date is before the ISIN-WKN change, but within 180 days	The event data ex date is also before the ISIN-WKN change, but falls outside of 180 days	Event data before the ISIN-WKN-change ex date	Price data before the ISIN-WKN change ex date	./.	./.
Data delivery on the day of the ISIN/WKN change, i.e. on 17 April 2022	#1: Cancellation of the old combination: WKN: 111111 ISIN: DE0001111117 GD100=29 Cancellation identifier (LKZ) = 8	#1: Cancellation of the previous data records WKN: 111111 ISIN: DE0001111117 BID: 123456789012 / Ex-Date: 13.03.2022 / ED001 = T Cancellation identifier (LKZ) = 8	The previous event data records are not delivered / cancelled as the ex date is older than 180 days. This means that the event data records with the old ISIN-/WKN combination remain valid in the system with UD001 = 2.	There will be no redelivery of the price data previously delivered under the old ISIN-/WKN combination.	There will be no redelivery of the price data previously delivered under the old ISIN-/WKN combination.	#1: Cancellation of the old combination: WKN: 111111 ISIN: DE0001111117 Cancellation identifier (LKZ) = 8	#1: Cancellation of all OHC data records still valid under the old ISIN-/WKN combination: WKN: 111111 ISIN: DE0001111117 BID: A12345678901 XD030 = "W" Cancellation identifier (LKZ) = 8
	#2 Full delivery under new combination: WKN: 111111 ISIN: DE0002222228 => GD100=05 Cancellation identifier (LKZ) = Blank with all previous master data fields	#2: Full delivery under new combination as the ex date is <= 180 days * WKN: 111111 ISIN: DE0002222228 BID: 000000000001 / ex date: 13.03.2022 / ED001 = 3 Cancellation identifier (LKZ) = 3		Only new prices are published under the new WKN / ISIN combination: WKN: 111111 ISIN: DE0002222228 ID901 from 15.04.2022	Only new data is published under the new WKN / ISIN combination: WKN: 111111 ISIN: DE0002222228 JV001 from 15.04.2022	#2: Full delivery under new combination WKN: 111111 ISIN: DE0002222228 Cancellation identifier (LKZ) = Blank with all previous RD and RV data fields	#2: Full delivery of all OHC data records still valid under the new ISIN/WKN combination WKN: 111111 ISIN: DE0002222228 BID: A22222222222 (new BID) Cancellation identifier (LKZ) = Blank XD001 = "1" and all previous XD and XV data fields

11.9.1. Matrix for the data provision: ISIN/WKN change Reason CW, CV, CX

This overview describes the operations described in item 11.7.1. in a structured way.

	G - Master data record	Event data with ex date greater than or equal to WKN/ISIN change	Event data with ex date lesser than WKN/ISIN change	Price data greater than or equal to WKN/ISIN change date	Price data lesser than WKN/ISIN change date	R - computation (e.g. RD003 or RV001)	X - Stock/futures exchanges and trading practices (OHC)
Reason	CW, CV, CX.						
Delivery / Business transaction	The special feature in this case is that the financial instrument remains , but there is at least one overlap. This means that the financial instrument with WKN 1 and ISIN 1 will keep one of the two identification features after the exchange.						
Cancellation under old WKN/ISIN	Yes	Yes	No	not relevant	No	Yes	Yes
New dielivery under new WKN/ISIN	Yes	Yes	No	Yes	No	Yes	Yes
Transfer of old data to new WKN/ISIN combination	Yes, see new delivery	Yes	No	-	No	Yes, see new delivery	Yes, see new delivery
Corrections for data before WKN/ISIN change under old WKN/ISIN change combination	not relevant, because no time series	No	Yes	not relevant	Yes	not relevant, because no time series	not relevant, because no time series
Corrections for data before WKN/ISIN change under new WKN/ISIN change combination	not relevant, because no time series	Yes	No	Yes	No	not relevant, because no time series	not relevant, because no time series

11.9.2. Matrix for the data provision: ISIN/WKN change Reason CF, CG, CH, CI, CJ, CK, CL

This overview describes the operations described in item 11.7.1. in a structured way.

	G - Master data record	Event data with ex date greater than or equal to ISIN/WKN change	Event data with ex date lesser than ISIN/WKN change	Price data greater than or equal to ISIN/WKN change date	Price data lesser than ISIN/WKN change date	R - Computation fields (e.g., RD003 or RV001)	X - Stock/futures exchanges and trading practices (OHC)
Reason	CF, CG, CH, CI, CJ, CK, CL						
Delivery / Business transaction	The special feature here is that the financial instrument remains , but it receives both a new WKN and a new ISIN.						
Cancellation under old WKN/ISIN	Yes	Yes	No	not relevant	No	Yes	Yes
New delivery under new WKN/ISIN	Yes	Yes	No	Yes	No	Yes	Yes
Transfer of old data to new WKN/ISIN combination	Yes, see new delivery	Yes	No	-	No	Yes, see new delivery	Yes, see new delivery
Corrections for data before WKN/ISIN change under old WKN/ISIN change combination	not relevant, because no time series	No	Yes	not relevant	Yes	not relevant, because no time series	not relevant, because no time series
Corrections for data before WKN/ISIN change under new WKN/ISIN change combination	not relevant, because no time series	Yes	No	Yes	No	not relevant, because no time series	not relevant, because no time series

11.9.3. Matrix for the data provision: ISIN/WKN change Reason CU

This overview describes the operations described in item 11.7.1. in a structured way.

	G - Master data record	Event data with ex date greater than or equal to WKN/ISIN change	Event data with ex date lesser than WKN/ISIN change	Price data greater than or equal to WKN/ISIN change date	Price data lesser than WKN/ISIN change date	R - computation (e.g. RD003 or RV001)	X - Stock/futures exchanges and trading practices (OHC)
Reason	CU						
Delivery / Business transaction	The special feature in this case is that the financial instrument changes (e.g. Australian securities) and the same ISIN is included in the database as a further financial instrument under a different, new WKN. Earlier (VF1 Alt) the former financial instrument (WKN alt) received a QW-ISIN in this case. With EDDY_neu, the ISIN allocated to the former financial instrument remains identical. The two differ now by their WKN.						
Cancellation under old WKN/ISIN	Yes	No, if the event data record concerned an old financial instrument. Yes, if the event data record concerned a new financial instrument.	No	not relevant	No	Yes	Yes
New delivery under new WKN/ISIN	Yes	Yes, if the event data record concerned a new financial instrument.	No	Yes	No	Yes	Yes
Transfer of old data to new WKN/ISIN combination	No, they are two different Financial instruments	Dependent on whether the event data record concerns a new financial instrument	No	-	No	Yes, see new delivery	Yes, see new delivery
Corrections for data before WKN/ISIN change under old WKN/ISIN change combination	not relevant, because no time series	No	Yes	not relevant	Yes	not relevant, because no time series	not relevant, because no time series
Corrections for data before WKN/ISIN change under new WKN/ISIN change combination	not relevant, because no time series	Yes	No	Yes	No	not relevant, because no time series	not relevant, because no time series

11.10. Delivery examples

11.10.1. Delivery example for an ISIN change without change of financial instrument

1. Initiating of the ISIN change - 01.03.2021		
WKN A2PEVX / ISIN US56585W4015		
	Delivery identifier Blank	
UD008A	Exchange reason	CH
UV217L for VFX	WKN post exchange	A2QQBE
UV217M for VFX	ISIN post exchange.	US5657881067
UV255M for VF1	Post conversion instrument WKN	A2QQBE
UV255N for VF1	Post conversion instrument ISIN	US5657881067
UD025	Ex date	03.03.2021
UV302	MASTER DATA ISIN CHANGE	

Note: In each lifecycle message, the linkage UV302 shows the corresponding master data of the new ISIN/WKN combination.

2. Delivery of the cancellation notice - delivery date 02.03.2021

WKN A2PEVX / ISIN US56585W4015

	Delivery identifier 8	
GD090	Effective date	Date UD025
GD100	Status	29 Cancellation
GV103	ISIN old	
	WKN old	
	Date	
	Reason for the change	
GD153	ISIN post change	US5657881067
GD153A	ISIN post change (reason)	CH

GD154	WKN post change	A2QQBE
GD622	ISIN	US56585W4015
GD622PW	WKN	A2PEVX

3. Delivery of the new and valid WKN/ISIN combination – delivery date 02.03.2021

WKN A2QQBE / ISIN US5657881067

	Delivery identifier Bank	
GD090	Effective date	
GD100	Status	02 New WKN due to conversion or exchange
GV103	ISIN old	US56585W4015
	WKN old	A2PEVX
	Date	02.03.2021
	Exchange reason	CH

3. Delivery of the new and valid WKN/ISIN combination – delivery date 02.03.2021

GD153	ISIN post change	
GD154	WKN post change	
GD622	ISIN	US5657881067
GD622PW	WKN	A2QQBE

Note: The delivery of the cancellation report for the old ISIN/WKN combination and the delivery of the master data for the new ISIN-WKN combination are delivered on the same day. This is to ensure that all information is available in time for the ex-date.

11.10.2. ISIN Reactivation

1. Initiation of the ISIN change - 01.03.2021		
WKN A1U7EY / ISIN US48246TWP01		
	Delivery identifier Blank	
UD008A	Exchange reason	CU
UV217L for VFX	WKN post exchange	A1V58W
UV217M for VFX	ISIN post exchange.	US48246TWP01
UV255M for VF1	Post conversion instrument WKN	A1V58W
UV255N for VF1	Post conversion instrument ISIN	US48246TWP01
UD025	Ex-date	03.03.2021
UV302	MASTER DATA ISIN CHANGE	

Note: In each lifecycle message, the linkage UV302 shows the corresponding master data of the new ISIN/WKN combination.

2. Delivery of the cancellation notice – delivery date 02.03.2021		
WKN A1U7EY / ISIN US48246TWP01		
	Delivery identifier 8	
GD090	Effective date	Date UD025
GD100	Status	29 Cancellation
GV103	ISIN old	
	WKN old	

2. Delivery of the cancellation notice – delivery date 02.03.2021

	Date	
	Reason for the change	
GD153	ISIN post change	US48246TWP01
GD153A	ISIN post change (reason)	CU
GD154	WKN post change	A1V58W
GD622	ISIN	US48246TWP01
GD622PW	WKN	A1U7EY

3. Delivery of the new valid WKN/ISIN combination - delivery date 02.03.2021

WKN A1V58W / ISIN US48246TWP01

	Delivery identifier Blank	
GD090	Effective date	
GD100	Status	65 Reactivation
GV103	ISIN old	US48246TWP01
	WKN old	A1U7EY
	Date	02.03.2021 (T-1)
GD153	ISIN post change	
GD154	WKN post change	

3. Delivery of the new valid WKN/ISIN combination - delivery date 02.03.2021		
GD622	ISIN	US48246TWP01
GD622PW	WKN	A1V58W

Note: The delivery of the cancellation report for the old ISIN/WKN combination and the delivery of the master data for the new ISIN-WKN combination are delivered on the same day. This is to ensure that all information is available in time for the ex-date.

11.10.3. ISIN change - correction of an ISIN incorrectly assigned to the WKN (WKN remains unchanged)

1. Initiation of the ISIN change - 27.08.2020		
WKN A3GKMR / ISIN XS1628321827		
	Delivery identifier Blank	
UD008A	Exchange reason	CV
UV217L for VFX	WKN post exchange	A3GKMR
UV217M for VFX	ISIN post exchange.	XS1512136422
UV255M for VF1	Post conversion instrument WKN	A3GKMR
UV255N for VF1	Post conversion instrument ISIN	XS1512136422
UD025	Ex-date	31.08.2020
UV302	MASTER DATA ISIN CHANGE	

Note: In each lifecycle message, the linkage UV302 shows the corresponding master data of the new ISIN/WKN combination.

2. Delivery of the cancellation notice – delivery date 28.08.2020		
WKN A3GKMR / ISIN XS1628321827		
	Delivery identifier 8	
GD090	Effective date	Date UD025
GD100	State	29 Cancellation
GV103	ISIN old	
	WKN old	
	Date	
	Reason for the change	
GD153	ISIN post change	XS1512136422
GD153A	ISIN post change (reason)	CV
GD154	WKN post change	A3GKMR
GD622	ISIN	XS1628321827
GD622PW	WKN	A3GKMR

3. Delivery of the new and valid WKN/ISIN combination - delivery date 29.08.2020		
Combination WKN A3GKMR / ISIN XS1512136422		
	Delivery identifier Blank	
GD090	Effective date	

3. Delivery of the new and valid WKN/ISIN combination - delivery date 29.08.2020		
GD100	Status	05 New WKN due to admission
GV103	ISIN old	XS1628321827
	WKN old	A3GKMR
	Date	30.08.2021 (T-1)
	Reason for the change	CV
GD153	ISIN post change	
GD154	WKN post change	
GD622	ISIN	XS1512136422
GD622PW	WKN	A3GKMR

11.10.4. ISIN change - correction of a WKN incorrectly assigned to the ISIN (ISIN remains unchanged)

1. Initiation of the ISIN change - 09.03.2020		
WKN A255CX / ISIN XS2133218201		
	Delivery identifier Blank

12. MTSUWO

The field MTSUWO was initially created in 2003. It is a simplification of the search for issuers and was established to spare data recipients to create their own search algorithm. To our knowledge, after more than 17 years, data recipients have already replaced this outdated representation of search parameters with more modern and sustainable search algorithms.

Furthermore, the issuer name is currently depicted in the field MD031. The configuration of the field allows a maximum length of 80 characters. This was another reason for opening the MTSUWO as the entire name is visible there in full length.

Under EDDy_neu the full name is depicted in a new field according to the commercial register and/or official documents:

- Field ID: MD851U
- Component.Variable: LegalEntityData.EntityLegalName

In our opinion, the new field fully represents the information required to search the name.

In addition to the name of the issuer, the domicile of the issuer's registered office is also represented in the MTSUWO. The corresponding field MD051 is limited to 40 characters. Analogous to MD031, this information will be depicted in a new field in the future:

- Feld ID: MV863D
- Component.Variable: Addresses.Place

In order to avoid redundant data, to reduce the size of the data feed and to replace it with modern search algorithms, there is no need to continue using MTSUWO under EDDy_neu. The corresponding field MD051 is limited to 40 characters. Analogous to MD031, this information will also be depicted in the future in addition to MD051, in a new field and/or fields:

- iField-ID: "Place" ("corresponding" field ID: MV863D) in format VFX and/or MV864D, MV864E and MV864F in format VF1
- Baustein.Variable: Addresses.Place

In order to avoid redundant data, to reduce the size of the data feed as well as to replace it by modern search algorithms, it is not necessary to continue to the use of MTSUWO under EDDy_neu

13. Pre-Notification

Currently, the publication of income on interest payments and of final maturity notifications for bonds and certificates is uniformly carried out approximately six to eight weeks before their (coupon) maturity.

Event data derived from the master data will continue to be published in EDDy_neu six to eight weeks before (coupon) maturity:

- Income on fixed-income securities and on securities with pro-rated interest rates
- Event data notices on final maturity
- Partial redemptions according to the redemption schedule

For income reporting of floating rate notes, event dependent securities etc. the following changes will be made under EDDy_neu:

Irrespective of the payment frequency, the publication of the income reports will be carried out simultaneously with the update of the interest rate information in the master data (initiated by external sources). For example, for floaters with an interest rate fixed before the start of the period and a quarterly or annual payment frequency, the income reports will now be published approximately two or ten months earlier than today.

14. WKN/ ISIN Quotas

For existing customers, there will be no change in the provision of WKN/ISIN quotas. As soon as issuers have used up existing ISIN / WKN quotas, new quotas can be purchased in the same

way as hitherto. However, grandfathering does not apply to customers who make use of this service for the first time after 1 January 2022.

15. Company affiliations

Company affiliations continue to be provided at issuer and instrument level. The previous fields in Segment M and Segment G will be deactivated and replaced by new fields (see also chapter [Information/fields are deactivated in Segment M and replaced by new fields in Segment M](#)).

Company affiliations are currently presented at the financial instrument level in GV646. This field will be replaced by GV065 for the delivery in VFX format or by GV069 for the delivery in VF1 format.

In addition to the current presentation, the country of domicile is provided in addition to the affiliation type (immediate/national/global parent, the name of the affiliated company and the issuer number (EKN), the customer number and the LEI is delivered. EKN and customer number are only delivered, if the company exists in the customer database. In this case - if available - the LEI is also supplied.

For the previously provided keys for the identification of the company affiliation "2-immediate parent to the issuer", "3 nationwide highest parent to the issuer" and "4- globally highest parent to the issuer", the keys "U", "L" and "W" are now provided instead (see tables below). The information "1-issuer of security" will be cancelled.

Company affiliations at the level of financial instruments are depicted in the variable Affil. Sec. 18 Stock Corporation Act (corresponding field ID: GV065 (VFX Format) or GV069 (VF1 Format) and supplemented by the variables affiliation type, name, country, LEI, customer number as well as the issuer number (EKN) of the affiliated company:

16. Zero identifier

16.1. Definition

Due to the unclear representation of some field contents in the WM database regarding the value/figure "0" and the blank value ZERO, an additional referencing field "Zero identifier" has been created. In this field, it is recorded positively that the value / figure "0" is depicted in the reference field.

Example:

Field_ID	Field name/ variable name
ED008A	DIVIDENDE/TOTAL AMOUNT
ED008D	ZERO IDENTIFIER. ED008A

16.2. Current depiction

Behind the

ZERO IDENTIFIER fields *

are the tables which provide all the corresponding keys that are used:

GE1 Key:

A interest rate = 0 (Null) / interest rate: 0,00%

E14 Key:

A 0 has been reported / zero reporting

B No company announcement received

C Income data incomplete (distributing fund)

D Income data incomplete (growth fund)

E Unknown / being verified

F 0 has been determined

G Not determinable due to missing rates

H are basically not accrued

16.3. Future depiction

Except for fields ED476B and ED476E, there is NO detailed information why the value of the field contains the value/figure "0".

This means that exclusively the following keys are used for the zero identifier:

GE1 Key: A Interest rate is 0 (zero) / Interest rate: 0.00%

E14 Key: A 0 has been reported / zero reporting

The following keys of table E14 are retained but will no longer be used in the future:

B No company announcement received

C Income data incomplete (distributing fund)

D Income data incomplete (growth fund)

E unknown / being verified

F 0 has been determined

G Not determinable due to missing rates

H are basically not accrued

17. New and old representation in segment D

With the product Options & Futures, WM Datenservice provides information on the trading objects of:

- Eurex Deutschland
- European Energy Exchange (EEX) – Futures market (Eurex)
- European Energy Exchange (EEX) - Regulated Gas Market
- Leipzig - European Energy Exchange (EEX) - OTF Gas Market

These so-called contracts and/or series were provided by WM in especially defined fields (DD011, DD012 etc.).

In the future, the contract specifications will be represented additively in the structure variable, component and blueprint.

This results in the following mapping of the existing fields in the new fields/variables:

Old field	Name	GD field	Name	XD field	Name
DD011	OPTION STYLE	GD352	OPTION RIGHT TYPE		
DD012	ISIN OF DERIVATIVE	GD622	ISIN		
DD013	WKN OF DERIVATIVE	WKN	WKN		
DD014	EFFECTIVE DATE	GD090			
DD015	DERIVATIVE STATUS	GD100 GD100 A	REASON FOR SECURITIES STATUS		
DD016	DERIVATIVE NAME	GD270 A GD270 B	SECURITIES LONG DESCRIPTION		
DD017	STANDARD SHORT DESCRIPTION	GD684 B	FISN

			PURSUANT TO MIFIR		
DD665	COUNTRY OF MOST LIQUID MARKET		Field will be deactivated		
DV021	DERIVATIVE MARKET/MIC				
DV021 A	DERIVATIVE MARKET/V			XD02 0	STOCK EXCHANGE OR MAIN SEGMENT
DV021 B	MARKET/MIC			XD02 6	MIC

Advantages:

ALL financial instruments (securities and derivatives) have the identical structure.

- This creates comparability and transparency
- Special requirements for programming specifications and selections are not necessary

18. Other changes (Splitting and merge of existing fields)

Beside the changes described under the other points, further variables are newly introduced as replacement or addition to already existing fields for EDDy_neu.

These new variables can replace and/or supplement old fields in EDDy_neu 1:1 or 1:N.

Whether the respective variable is a replacement for an old field or an addition to a field, which itself will continue to exist under EDDy_neu, is indicated in column 6 (Replaced) and 7 (Added), and partially in the descriptive text in column 8, (Description/content of the variable).

If both columns 6 and 7 are populated at the same time, this represents a partial replacement. In this case, the new variable replaces the old field in a very limited scope, e.g. for a specific asset class or a specific issue. For all other asset classes and circumstances, however, the old field remains and thus represents a supplementary variable in its actual function.

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
ED008L	TOTAL DIVIDEND/INCOME	N	Old: 9.12 New: 9.9	/		ED008A	Gives the representation of a dividend payment is own variable for the total amount of a dividend payment.
ED019A	DECLARE-DATE	D	8	/		ED019	Gives the declare date its own place beyond ED019 providing the AGM/GM date.
ED034F	IDENTIFIER FOR THE CANCELLATION OF THE AVOIR FISCAL IN FRANCE	N	01	E08		ED034	Gives the ID for the deletion of the avoir fiscal date its own place beyond ED034 that provides information on the tax deduction and the half-income procedure in Germany.
GD230E	CLASS	X	39	/			Description of the class of the security
GD230F	TRANCHE	X	39	/			Description of the tranche of the security
GD230G	SERIES	X	39	/			Description of the series of the security
GD230L	NUMBER OF INSTRUMENTS WITH VOTING RIGHTS	N	8.7	/	GV128A		As a voting right is expressed only once per instrument, the repetitive group of the host field GV128 with the linkage fields GV128A-E have been
GD230M	VOTING RIGHT PER INSTRUMENT MASTER DATA	N	8,7	/	GV128B		

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
GD230N	DIMENSION NUMBER OF VOTES PER INSTRUMENT MASTER	X	03	W02	GV128C		transferred to basic variables without respective group character. The content of the linkage GV128D "Voting right- validity date" is not transferred to EDDy_neu, and there is no equivalent in EDDy_neu.
GD230Q	VOTING RIGHT SECURITY DATA	X	01	G83	GV128E		
GD231L	UNIT NUMBER AND DESCRIPTION COMPONENT 1	X	50	/	GD280A, GD280B		The components of which a unit is composed are to be recorded and saved in EDDy_neu in a standard way. In each of the 4 variables GD231L_GD231O one component is given in whole or decimal numbers with max. 4 decimal places. The decimal numbers are separated by a comma . Up to 13 digits can be used before the decimal place. The components consist of the respective number, the security type, specifying information such as the final maturity in the case of warrants and, if applicable, the company name of the issuer who issued the respective security component, e.g. 1 share A of XYZ
GD231M	UNIT NUMBER AND DESCRIPTION COMPONENT 2	X	50	/			
GD231N	UNIT NUMBER AND DESCRIPTION COMPONENT 3	X	50	/			
GD231O	UNIT NUMBER AND DESCRIPTION COMPONENT 4	X	50	/			

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
							AG or 20000 warrants 21.03.26. Each sub string ends without a comma, semicolon or dot.
GD311D	PARTICULARITIES DIVIDENDS	X	01	FF1	GD311A	GD311A	Gives the particularities of dividends their own place instead of GD311A.
GD311E	PARTICULARITIES FUND DISTRIBUTIONS	X	01	FF2	GD311A	GD311A	Gives the particularities of fund distributions their own place instead of GD311A.
GD311F	PARTICULARITIES INTEREST	X	01	FF3	GD311A	GD311A	Gives the particularise of interest their own place instead of GD311A.
GD321A	DIVIDEND ENTITLEMENT NEW SHARES	N	02	G15	GD321	GD321	Gives the dividend entitlement of new shares their own GD321 that serves to record the identifier for the deviating interest rate start date and for the deviating conditions at interest accrual end date.
GD322A	DIVIDEND ENTITLEMENT NEW SHARES	D	8	/	GD322	GD322	Gives the date from which the dividend entitlement of a new share starts its own place in addition to GD322, which provides the date for bond issues.

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
GD80 2D	ABS/CP/MTN PROGRAM	X	01	G8 3			This field indicates whether the present security belongs to a CP or MTN program.
GD80 2E	UNDATED	X	01	G8 3			This field indicates whether the security has no fixed maturity date.
GD80 2F	INTEREST ONLY	X	01	G8 3			This field identifies whether it is an interest only (IO) security.
GD80 2G	POOL NUMBER	X	39	/			This field contains the pool number of the security.
GD91 0C	REDEMPTION DATE	D	8	/	GD910	GD910	Gives the redemption date for participation certificates and warrants their own place in addition to GD910 that is then used to record the redemption date of bond issues and certificates.
GD91 0D	MATURITY DATE	D	8	/	GD910	GD910	Gives the maturity date of funds, redeemable preference shares and restricted shares their own place in addition to GD910 which serves the recording of the redemption date of bond issues and certificates.
GV1E 7	INTEREST DATES	U	00	Div.			All interest dates of the security are

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
GV1E7A	DATE	D	08	/			represented here. If the exact dates have not been provided by the issuer of the security, WM determines the interest dates on the basis of the available data. In this case, the actual interest dates may differ from the dates depicted in GV1E7. If not enough information is available to determine the interest dates, the field will not be populated.
GV9U4	CLASS TYPE	U	00	Div.			Additional information on the class can be entered here according to table FK3
GV9U4A	CLASS TYPE	X	01	FK3			
KD005A	EVENT TYPE	N	2	K01	KD005		Adjusts the wording to the EDDy_neu environment. The variable name is adjusted editorially.
KD014A	BEGINNING OF SUBSCRIPTION PERIOD	D	8	/	KD014		Deletion of field KD014, in which 2 different situations (DEADLIINE FROM TO) were depicted in the past.
KD014B	END OF SUBSCRIPTION PERIOD	D	8	/			
KD015A	SUBSCRIPTION RIGHT NOTICE FROM	D	8	/	KD015		Deletion of field KD015, in which 2

Variable ID (new)	Variable name (new)	Format	Length	Table	Replaced	Adjusted	Description/Content of the variables
KD01 5B	SUBSCRIPTION RIGHT NOTICE TO	D	8	/			different situations (DEADLINE FROM TO) were depicted in the past.
KD01 5C	MINIMUM SUBSCRIPTION PRICE	N	8.5	/	KV056		Deletion of field KV056, which is a linkage field without a repetitive group. As this structure is not necessary for EDDy_neu, 2 new variables were created.
KD01 5D	MAXIMUM SUBSCRIPTION PRICE	N	8.5	/			
KV12 3	SUBSCRIPTION RATIOS	U	0	Div.	KD008 A, KD008 B, KD008 C, KD009 A, KD009 B, KD009 C, KD022, KD022 PI		In the case of corporate actions, there may be a combination of several payments and/or several classes referred to. Until now, BIDs had to be created in order to depict all allocations or information had to be recorded textually behind the corresponding fields. With the repetitive group KV123, the possibility is created to represent multiple reference as a whole in a GV and to assign multiple new WKN/ISIN to these multiple references. The new variables KV123B, KV123C, KV123D, KV123E, KV123F, KV123G, KV123L, KV123M are identical in content and function to the
KV12 3A	CONSECUTIVE NUMBER	N	2	/

19. Abolition of BID 91

WM Datenservice will not deliver so-called deadline BIDs in the future, identified by the date in field GD090 or XD110 greater than the current date.

Thus, the delivered information is effective as soon as it is published, unless there is no corresponding date field (such as ex date) for the respective information.

In EDDy_neu the above mentioned fields are treated like all other fields. They are only delivered if an adjustment has been made in the field and if they are part of the respective profile. Please also refer to our document: <https://eic.wmdaten.com/index.php/documents/category/9>

20. IBOR

20.1. Introduction

The replacement of reference interest rates (keywords: IBOR Reform, Interbank Offered Rates (IBOR), Risk-free Rates (RfRs), Risk-free Rates Benchmarks, Benchmark Reform) by the end of 2021 also requires corresponding adjustments in the WM database. To reflect these changes, we will summarize, with the following concept, the key points of the reform. This concept is closely linked to the concept for the depiction of interest rate phases / floaters under section 21. The underlying, which is the object of the design in the following fields, is presented in GV1F47/ GV1F48. This concept is not technically implemented as a table variable. The following fields represent individual fields.

20.2. Functionality

Field ID	Name	Table	Table content (Decode)	Commentary
GD802L	Compounded/Simple Average	Table FK4	<ul style="list-style-type: none"> •Compounded • Simple Average 	
GD802M	Backward/Forward-Looking	Table FK5	<ul style="list-style-type: none"> •Backward • Forward 	
GD802N	Backward Type	Table FK6	<ul style="list-style-type: none"> • Lookback Period • Payment Delay • Last Reset • Lockout/ 	

Field ID	Name	Table	Table content (Decode)	Commentary
			Suspension Period	
GD802P	Lookback Type	Table FK7	<ul style="list-style-type: none"> • Shift • Lag 	
GD802Q	Lookback or Lockout Days	-	-	
GD802R	Type of Lookback or Lockout Days	Table FM5	<ul style="list-style-type: none"> • Bank working days • Calendar days 	
GD802S	Waterfall Level 1	Table FK5	<ul style="list-style-type: none"> • Backward • Forward 	
GD802T	Waterfall Level 2	Table FK5	<ul style="list-style-type: none"> • Backward • Forward 	
GD802U	Effective Date Reference Date New	-	-	If there has been a change in the reference interest rate as part of the reform, the effective date of this change is provided here.
GD802V	ISIN Reference Interest Rate Old	-	-	The ISIN of the reference interest rate valid before the reform.
GD802W	Margin Sign Old	Table FL7	<ul style="list-style-type: none"> • + • - 	The plus/minus sign to the margin of the previous reference rate from GD802V.
GD802X	Margin Old	-	-	The margin of the previous reference rate from GD802V.

Source:

When using the new technical interest rate terms to determine the core of the interest rate calculation and the elements for the interest rate base information, there will be no translation into German. On 23 November 2020, the ECB published a reference documentation.

“Public consultation by the working group on the euro risk-free rates”. Source: www.ecb.europa.eu

21. Concept for the presentation of interest phases / floater

21.1. Introduction

In this concept, the interest phases of a security and the details of the floater structure are depicted. The current depiction of these two separate issues is implemented in GV325 (interest rate phases) and GD808 et seq. (interest/dividend amount dependency).

In the future implementation via EDDy_neu, these two sub-areas will be merged under the generic term "interest phases", as they often interlock in practice and thus complement each other in a meaningful way. How this interlocking is to be understood will be explained in the following.

The representation of this new concept is additive to the currently existing field assignment. In the new EDDy_Neu data feed, the old and the new representation of the fields are both included in one delivery. The representations will be provided redundantly until further notice, even after the parallel phase. Please note that under EDDy_neu the additional text fields / additional information for individual fields will no longer be delivered (chapter 8).

The field adjustments according to documentation D20_E are to be understood as additive in this chapter. The representation via old fields and contents will continue to be delivered after the parallel phase has ended.

21.2. Functionality

The new structure differs from the presentation of the individual fields around GD808 ff. in that all the information previously recorded there is now combined under a table variable GV1F4 (INTEREST PHASES). The presentation of the original fields in GV325 (INTEREST PHASES) has been largely adopted and does not differ fundamentally from the new presentation, as these fields already functioned like table sub-variables in the old presentation. The old wording for this was "linkage fields".

It is now possible to enter any number of entries for the table variable. From a practical point of view, however, in most cases one to a maximum of three rows will be filled.

The table is filled for entries that represent a) several changing interest phases or b) floaters (GD805=V).

Please note that an interest phase is not the same as an interest period. An interest phase usually contains several interest periods.

21.3. Detailed field description of the field structure

New Field ID	Name	Old field	Description
GV1F4	INTEREST PHASES	Not available	The parent field of the table variable is not populated.
GV1F40	TYPE	GV325A	The type of interest phase. For the old field GV325A, the underlying key table has changed slightly. The key "Pro-rated interest rates" has been removed; the key "Fixed interest amount" has been added.
GV1F41	INTEREST CALCULATION METHOD	GV325D	The interest calculation method according to table F93.
GV1F42	DATE FROM	GV325B	The start date of the respective interest phase.
GV1F43	DATE TO	GV325C	The end date of the respective interest phase.
GV1F44	INTEREST RATE	Not available	An interest phase with a fixed interest rate is shown here as interest p.a. The indication is in percent, analogous to the field GD801A.
GV1F45	FIXED INTEREST AMOUNT	Not available	In this field, fixed interest amounts independent of interest periods are shown, which were previously shown via the flow texts in GD801A or GD805.
GV1F46	FIXED INTEREST AMOUNT CHARACTERISTIC	Not available	The value of the corresponding fixed interest amount in GD802J GV1F45 is shown here. Either it is a percentage or an amount in issue currency.
GV1F47	INTEREST RATE DEPENDENCY ISIN (PARALLEL FIELD)	GD808PI	In case the interest rate is dependent of another instrument, this field contains the ISIN of the corresponding instrument.

New Field ID	Name	Old field	Description
GV1F48	INTEREST RATE DEPENDENCY WKN	GD808E	In case the interest rate is dependent of another instrument, this field contains the WKN of the corresponding instrument.
GV1F49	REFERENCE TERM TYPE	GD808A	This field contains the type of maturity of the instrument on which the interest rate amount depends.
GV1F4A	REFERENCE TERM QUANTITY	GD808B	According to field GV1F49 REFERENCE-TERM TYPE, this field contains the number of days/weeks/months/years of the term of the instrument on which the amount of the interest rate depends.
GV1F4B	INTEREST RATE FIXING DAY COUNT	GD809	This field contains, for floating rate securities, the numerator for the day on which the new interest rate is set. The basis for the calculation of the days is given in field GV1F4E DAY COUNT BASIS.
GV1F4C	DATE OF NEXT INTEREST RATE FIXING	GD809A	This field contains the date when the interest rate for the next interest period will be set.
GV1F4D	INTEREST RATE FIXING DAY TYPE	GD809B	This field contains the type of days according to table F07.
GV1F4E	DAY COUNT BASIS	GD809C	This field contains the basis for the calculation of the days for floating rate classes in addition to field GV1F4B INTEREST RATE FIXING DAY COUNT.
GV1F4F	FIXING-TERM NUMBER / SECURITY	GD811D	This field contains the number corresponding to field GV1F4G FIXING-TERM TYPE / SECURITY.
GV1F4G	FIXING-TERM TYPE / SECURITY	GD811C	This field contains the type of term of the fixing of the security. The corresponding number is provided in field GV1F4F.

New Field ID	Name	Old field	Description
GV1F4H	BASE INTEREST %	GD804B	<p>This field contains the base interest rate in % for index-linked bonds.</p> <p>For inflation-linked bonds (par value variant, see [OLD: GV749] NEW: GD749 - key 1), the base interest rate is multiplied by the index coefficient from field GV958 INDEXATION COEFFICIENT.</p> <p>In the case of reverse floating rate bonds, the field contains the base interest rate in % from which the reference interest rate according to field GV1F47/ GV1F48 is subtracted or, if necessary, added x-times.</p>
GV1F4J	BASE INTEREST OPERATOR	Not available	<p>Calculation operator in relation to the base interest rate in GV1F4H. In the case of reverse floaters, the key "-" must be selected, since a multiple of the reference interest rate as per field GV1F47/ GV1F48 is deducted from the base interest rate. For inflation-linked bonds, the key "*" must be selected, as the prime rate is multiplied by the index coefficient. Both keys are provided in table FL5.</p>
GV1F4K	MULTIPLICATION FACTOR	Similar to GD804C (without plus /minus)	<p>This field contains the multiplier used to determine the multiple of the reference interest rate according to field GV1F47/ GV1F48, which is deducted from or added to the base interest rate in field GV1F4H.</p>
GV1F4L	MULTIPLICATION FACTOR BASIS	Not available	<p>Indicates, according to table FL6, whether the multiplication factor refers to the base rate or to the (interest) underlying.</p>
GV1F4M	MARGIN SIGN	Not available	<p>The sign for the GV1F4N field. The corresponding table is FL7.</p>
GV1F4N	MARGIN	Similar to GD808C (without plus /minus))	<p>This field contains the percentage that will be deducted or added to the instrument in field GV1F47/ GV1F48.</p>

New Field ID	Name	Old field	Description
GV1F40	MINIMUM INTEREST RATE/ DIVIDEND	GD803E	<p>This field contains, if applicable, the minimum interest rate according to the terms of issue in the case of floating-rate securities and the minimum dividend rate in the case of preferred shares. The maximum interest rate or maximum dividend rate is contained in field GV1F4P MAXIMUM INTEREST RATE/DIVIDEND.</p> <p>If the value provided in this field is an interest rate, the field GV1F4Q PERCENTAGE IDENTIFIER is populated (usually %), if, instead, it is an amount, the field GV1F4R CURRENCY DIVIDEND/INTEREST is occupied with the corresponding currency.</p> <p>The applicable interest rate is provided in field GD801A INTEREST RATE % P.A. for floating rate securities, while the applicable dividend rate payable on preferred shares is reported exclusively in Segment E Income Notices.</p>
GV1F4P	MAXIMUM INTEREST RATE/ DIVIDEND	GD804E	<p>This field contains, if applicable, the maximum interest rate according to the terms of issue in the case of floating-rate securities and the maximum dividend rate in the case of preferred shares. The minimum interest rate or minimum dividend rate is contained in field GV1F40 MINIMUM INTEREST RATE/DIVIDEND.</p> <p>If the value provided in this field is an interest rate, the field GV1F4Q PERCENTAGE IDENTIFIER is populated (usually %), if, instead, it is an amount, the field GV1F4R CURRENCY DIVIDEND/INTEREST is occupied with the corresponding currency.</p> <p>The applicable interest rate is provided in field GD801A INTEREST RATE % P.A. for floating rate securities, while the applicable dividend rate payable on preferred shares is reported exclusively in Segment E Income Notices.</p>

New Field ID	Name	Old field	Description
GV1F4Q	PERCENTAGE IDENTIFIER	GD806	<p>This field contains the percent sign (%) if the fields</p> <p>GV1F4O MINIMUM INTEREST RATE/DIVIDEND</p> <p>GV1F4P MAXIMUM INTEREST RATE/ DIVIDEND GD807 INTEREST/ DIVIDEND PREFERENCE contain a percentage.</p> <p>It contains a blank if these fields are populated by amounts.</p>
GV1F4R	CURRENCY/UNIT/TOKEN DIVIDEND/INTEREST	GD806A	<p>This field contains the currency according to tab no. W01 for fields GD803E MINIMUM INTEREST RATE/DIVIDEND, GD804E MAXIMUM INTEREST RATE/DIVIDEND, GD807 INTEREST/DIVIDEND PREFERENCE.</p>
GV1F4S	DEPENDENT INTEREST RATE %	GD808D	<p>In the case of percentage dependencies, e.g. of indices, this field contains the percentage of the dependency.</p> <p>The instrument on which the interest/ dividend amount depends is provided in field GV1F47/ GV1F48.</p>
GV1F4T	FLOATER CLASSIFICATION NBF	GD189H	<p>This field is used to classify floaters with respect to the complexity of their coupons. Table GR9 is relevant here.</p>
GV1F4U	COMPLEX STRUCTURE	Not available	<p>This field identifies floating rate financial instruments, for which, due to the complexity of the floater terms, a fully formatted representation in the WM database is not possible. The entries in table FL8 are relevant for this purpose. The three entries</p> <p>“Frequency switch event” “Coupon switch option” and “Frequency change”</p> <p>Indicate concrete circumstances, while the "complex" entry indicates another undefined complex circumstance.</p>

21.4. Overview of old fields

In the new Eddy_Neu data feed, the old and the new representation of the fields are both included in one delivery. The representations are provided redundantly.

Field ID	Name
GD806	% identifier
GD806A	Div./int.C/U/T
GD808	Int./div. link.
GD803E	Minimum int./div.
GD804E	Maximum int./div.
GD804B	Base int. rate %
GD804C	Multipl*IBOR+./.
GD808E	Int.linkage WKN
GD808PI	Int.linkage ISIN
GD808A	Linkage term type
GD808B	Link.term.quant.
GD808C	Perc*IBOR+./.
GD808D	Int.linkage %
GD809	Int.rate fix.date
GD809A	Next rate fixing

Field ID	Name
GD809B	Int.fix.day spec.
GD809C	Day count basis
GD811D	Fix.Term No. Sec.
GD811C	Fix.Term.Type Sec
GD814	Techn. int. date
GV325	Interest phases
GD189H	Floater class.

The field changes according to document D20_E are to be regarded as additive to this chapter. The old representation via old fields and contents will be provided even after the parallel phase has ended.

21.5. Example of field population (decode values)

In the case of the empty cells, the corresponding information is either not relevant or unknown at the time of entry

22. ESG

22.1. Introduction

ESG investments have gained enormous importance in recent years. It is becoming increasingly important for investors to ensure that their investment decisions meet not only economic but also environmental, social and both political and societal justice requirements. For us as a data provider, it is therefore necessary to accurately identify the details in each case.

22.2. Functionality

Until now, we have maintained the field GD662B (KEY SUSTAINABLE FINANCIAL INSTRUMENTS GREEN BONDS) in our database. This yes/no specification is now replaced by the field GD504Y (ESG BOND) with the underlying FK2 table. The table contains the following entries:

Table FK2 entries
Green bond
Social bond
Sustainability bond
Other ESG bond

22.3 Expansion of the MIFID II target market to include ESG preferences

In the context of the European Green Deal and the embedded "Action Plan: Financing Sustainable Growth", the current target market descriptions shall be expanded on the basis of corresponding ESMA requirements, by taking into account ESG preferences, which include environmental, social and governance aspects.

In the process of the final consultations with the WM Regulatory Working Group, the introduction of three new data fields with corresponding characteristics as well as the adjustment of two existing target market fields was implicitly confirmed by the market (incl. associations) by commissioning WM Datenservice with the implementation of the fields. We have already published a corresponding Special Information issue in February 2021. (Special Information F01a of February 2021).

Overview New fields/variables:

Description	Field	Variable	Table	Permissible values /Decodes	Format	Multi Value Y/N
SUSTAINABILITY_PREFERENCE	GD350W	SustainPreference	FJ2	Please refer to the WM-Dok for the current keys.	Alphabetic, 1 character	N
SUSTAINABILITY_MAIN_FOCUS	GD350Y	SustainMainFocus	FJ3	Please refer to the WM-Dok for the current keys.	Alphabetic, 1 character	N
SUSTAINABILITY_LABEL*	GV9W9	SustainLabel	FJ4	Please refer to the WM-Dok for the current keys.	Numeric, 2 digits	Y

23. Payment in kind

23.1. Introduction

Up to now, the payment-in-kind topic was represented in field GD763B (PAYMENT IN KIND TYPE). The detailed features were shown in the continuous text of GD801A (INTEREST RATE %). The continuous texts will be replaced by structured fields. The feature details can be depicted via the following concept. This concept replaces the previous representation.

23.2. Functionality

The concept is represented as a table variable. Each piece of information is therefore to be read in the context of the row in which it occurs. The information in GV1F3A (DATE FROM) and GV1F3B (DATE TO) is not exclusive, i.e. it is possible to create several rows for the same PIK phase. This is necessary for the cases where there is a toggle possibility. See also the examples in the following sub-chapter.

23.3. Detailed field description of the new field

Field ID	Name	Description
GV1F3	PAY IN KIND	The parent field of the table variable. It is not populated.
GV1F3A	DATE FROM	The start date of the respective PIK phase.
GV1F3B	DATE TO	The end date of the respective PIK phase.
GV1F3C	CASH	Cash payment in percent p.a. during the selected PIK period.
GV1F3D	NOTES	Payment in notes in percent p.a. during the selected PIK period.
GV1F3E	TOGGLE	This field indicates, on the basis of the issuer's choice, whether a payment is effected in cash or notes or a hybrid thereof.

Field ID	Name	Description
GV1F3F	DETAILS UNKNOWN	If the details of the PIK treatment are currently unknown, this field is populated by "J". E.g. if a toggle feature exists, but the amount of additional notes has not yet been determined.

Field population example (decode values)

	DATE FROM	DATE TO	CASH	NOTES	TOGGLE	DETAILS UNKNOWN
Description in Text form	GV1F3A	GV1F3B	GV1F3C	GV1F3D	GV1F3E	GV1F3F
Issuer can opt for interest payment in cash or in additional notes. Interest payment in cash is at 8.875%, interest payment in additional notes is at 9.625%.	01.01.2020	31.12.2021	8.875		Yes	
	01.01.2020	31.12.2021		9.625	Yes	
Interest paid in cash at 5% and in additional notes at 5%	01.01.2020	31.12.2021	5	5	No	
7.5% in cash or unknown amount of additional notes, from 2018: 10% in cash or unknown amount of additional notes.	01.01.2017	31.05.2018	7.5		Yes	
	01.01.2017	31.05.2018			Yes	Yes
	01.06.2018	31.12.2020	10		Yes	
	01.06.2018	31.12.2020			Yes	Yes
Issuer can opt that interest payments are made for the first two interest periods at 5% in cash and 3% in additional notes or at 8% in additional notes. Interest payments for the following interest periods are made at 5% in cash and 3% in additional notes.	01.01.2017	31.05.2018	5	3	Yes	
	01.01.2017	31.05.2018		8	Yes	
	01.06.2018	31.12.2020	5	3	No	

24. Calls/Puts

24.1. Introduction

This table variable can be used to enter detailed information on the individual call/put dates and their respective features. This applies to all call, put, and special call types equally. This concept replaces the previous presentation in fields GD941ff (call type), GD951ff (put type) and GD961ff (special call type).

24.2. Functionality

Each individual call/put date is shown in a separate row of the table variable. This applies also to different call and put types as shown in the examples under 24.5.

24.3. Detailed field description of the new field structure

New Field ID	Name	Old field	Table	Table values (Decode)	Description
GV1F5	CALLS/PUTS	Non existent	-	-	The parent field of the table variable. It is not populated.
GV1F50	CALL/PUT TYPE	Non existent	FL9	<ul style="list-style-type: none"> • Call • Put • Event-driven 	Generic term for the type of termination with adapted terms. Debtor termination (call), creditor termination (put), special termination (event-driven).
GV1F51	EVENT-DRIVEN TYPE	partially GD961, GD951A	FM1	<ul style="list-style-type: none"> • for tax reasons • Barrier breach (share / underlying) • Clean up call • Collateral clean up call • Deal clean up call • Equity claw back call • Control change • Majority decision holder controlling class / sub. Nts 	Value, if the key "Event-Driven" has been selected in GV1F50.

New Field ID	Name	Old field	Table	Table values (Decode)	Description
				<ul style="list-style-type: none"> • Mandatory conversion into shares upon occurrence of a trigger event • other 	
GV1F52	AUTOCALL	Non existent	G83	<ul style="list-style-type: none"> • Yes • No 	
GV1F53	MAKE WHOLE CALL	Non existent	G83	<ul style="list-style-type: none"> • Yes • No 	
GV1F54	PARTIAL CALL/PUT	Non existent	G83	<ul style="list-style-type: none"> • Yes • No 	
GV1F55	CLEAN UP PERCENTAGE	GD258J	-	-	If a clean up call has been selected in GV1F51, this field contains the clean up % rate. As soon as the clean up % rate falls below the original exposure volume, the issuer has the right to immediately redeem the outstanding bonds.
GV1F56	EQUITY CLAW BACK START DATE	Non existent	-	-	The corresponding start date if the key for "equity claw back call" has been selected in GV1F51.
GV1F57	EQUITY CLAW BACK END DATE	Non existent	-	-	The corresponding end date if the key for "equity claw back call" has been selected in GV1F51.
GV1F58	EQUITY CLAW BACK PERCENTAGE	Non existent	-	-	The corresponding percentage if the key for "equity claw back call" has been selected in GV1F51.

WM Datenservice

New Field ID	Name	Old field	Table	Table values (Decode)	Description
GV1F59	BARRIER BREACH PERCENTAGE	Non existent	-	-	The corresponding percentage of the barrier if in GV1F51 the key for "Barrier breach (share/underlying)" has been selected.
GV1F5A	CALL/PUT DATE	GD942, GD952, GD962	-	-	This linkage provides the exact call/put date if GV1F5C PERIODICITY TYPE is populated by key 3 "on specific dates". If key 1 "At any time" or key 2 "On every interest date" is indicated in GV1F5C, the entry in this field is interpreted as the start date (from).
GV1F5B	CALL/PUT PRICE	GV945, GV955,; GV965; contains information from GD944A, GD954A, GD964A	-	-	The call/put price as of the date in GV1F5A, if available.
GV1F5C	PERIODICITY TYPE	partially GD941, GD951, GD961	FM2	<ul style="list-style-type: none"> • any time • at every interest date • at certain dates • cannot be depicted 	Indication in which interval the call/put date from GV1F5A is recurrent. If there are several call/put dates, this information is also repeated in each line.
GV1F5D	INTERVAL	Not available	-	-	The field block GV1F5D to GV1F5G can be populated if the key for "on specific dates" has been selected in GV1F5C. Then an indication of the underlying periodicity is possible in this block, provided that the periodicity can be mapped.
GV1F5E	INTERVAL TYPE	Not available	FM3	<ul style="list-style-type: none"> • Year • Month 	In this case, the interval of the call dates is defined in GV1F5D in connection with the entry in GV1F5E.
GV1F5F	MONTH	Not available	FK9	<ul style="list-style-type: none"> • January • ... • December 	
GV1F5G	DAY	Not available	FM4	<ul style="list-style-type: none"> • 1st of the month

25. Inactive financial instruments

Under EDDy_neu, no changes will be made to inactive financial instruments in the future (GD100A = 3). However, as indicated in our Issuer Information issue "E03_2019", this does not apply to the products MIR II C, MIR II, and PRI as well as the investment fund prices in the products IFP, EBK, and JEK.

26. Contacts

If you have any queries, please contact the EDDy Information Center (EIC) customer portal at eic@wmdaten.com. Please refer to the number of this document in your subject line.
